

SPTek REDUCER™

GAUGE REDUCTION ADDITIVE

Reduces raw materials

- The reducer additive is based on the principle of the inclusion of specific process-aiding components to an existing plastic substrate
- Designed for use in polyolefins like PE & PP
- Provides enhanced mechanical properties, namely improved dart impact resistance and tear initiation properties
- Allows for the reduction of cross section thickness while maintaining original mechanical specifications—uses significantly less raw material
- Reduction of freight costs for bulk film and packaged goods shipping
- Extensive independent testing—proven reliability
- FDA approved
- Resin carrier
- 100% recyclable

SMALL CHANGES THAT MAKE BIG DIFFERENCES™

SmartPlastic additives are inserted into the production process in very small percentages along with other standard ingredients.

The resulting "Smart Plastic" is changing industries, positively impacting the environment and making a difference in people's lives.
