Global Leaders in Financial Market Software

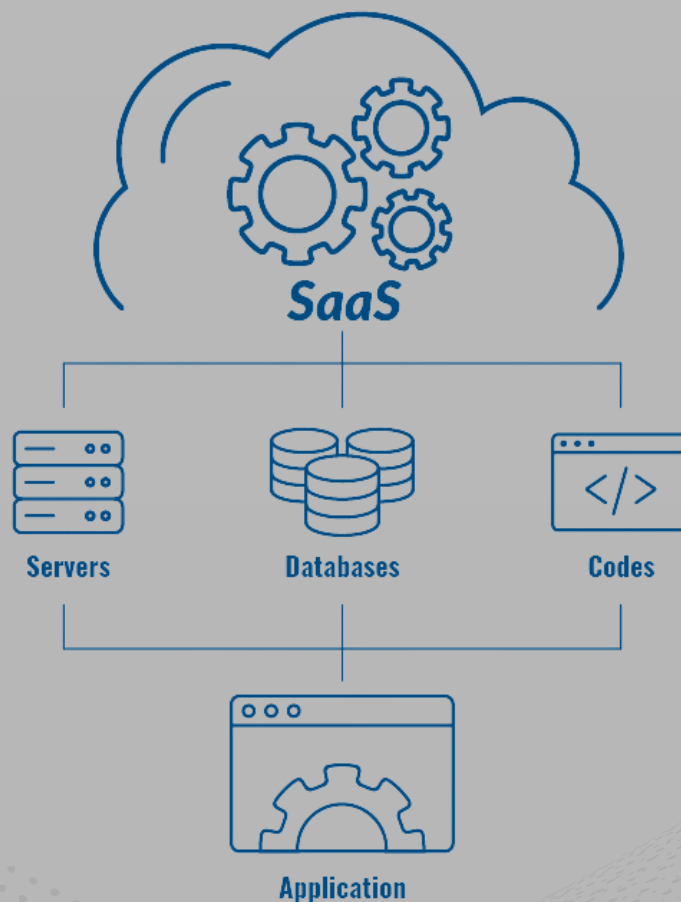

SAAS

STT's latest offering is a SaaS model. All STT products can either be hosted on premise (Installed on client's infrastructure) or as a SaaS. If a client chooses the SaaS approach, it will be hosted at a cloud data centre offered at different locations.

In the Software as a Service (SaaS) approach, STT's applications are delivered as complete hosted solutions in the form of a service. Rather than installing and maintaining the software and servers, clients simply need to access the software over the Internet. All software updates, IT infrastructure and maintenance is managed by STT. Ensuring all our clients need to focus on is their operations and core business.

In SaaS hosting, STT's software resides on dedicated or virtual servers that run the software. Clients access the software interface through either a private VPN connection or over the internet - via either a local client specifically built for the software or through a browser.

SOFTWARE-AS-A-SERVICE

BENEFITS OF USING SAAS

- With SaaS hosting, the software is maintained and updated for you.
- Upgrades can be done a lot quicker as STT controls the deployment pipelines to the servers.
- Accessibility: ability to connect over the internet from anywhere.
- Operational Management: No installation, equipment updates or traditional licensing management.
- Cost Effective: No upfront hardware costs.
- Scalability: Easily scale a solution to accommodate changing needs.
- Data Storage: Data is routinely saved in the cloud and we manage your Database, its maintenance, archiving, and back ups.
- Backups of all data included.
- Cost effective Disaster Recovery with quick recovery times less than 15 minutes in the event of failure.
- Ability for Active-Active Disaster Recovery Sites.
- Insures 99.9% availability of Infrastructure.
- Experienced IT specialists to handle all your needs.
- Increased Security: We invest heavily in security technology and expertise and only use ISO 27001 compliant datacentres.
