

A Message From LigoLab CEO Suren Avunjian

It is with great pleasure and gratitude that I accept the Frost & Sullivan Competitive Strategy Leadership Award on behalf of our talented LigoLab team and our loyal customers. We would not have been able to build the company and the platform that exists today without the dedication of our staff and the support of our lab partners, who continue to share our vision and understand the power of having an all-in-one laboratory information system unified by one source of truth.

Back in 2006, we launched LigoLab Information System with the goal of providing medical laboratories with the most comprehensive and adaptable operating platform on the market, one that would maximize interoperability and remove the growth barriers and inefficiencies that come with multiple systems and multiple vendor solutions. This truly integrated platform has been a game-changer for our customers, as has our pricing model that aligns with a lab's business goals, and our unlimited and responsive 24/7 support.

Now into our 16th year as a company, it's with great pride that we look back at where we started, and with even greater enthusiasm we look forward to what's still to come. I wish to thank Frost & Sullivan for this award recognition, and our staff and customers for making a crazy dream that was born almost two decades ago come true.

Yours Truly,

Suren Avunjian
Chief Executive Officer
