

News from CureGN

June 2017

Sponsored by the National Institutes of Health (NIH)
National Institute of Diabetes and Digestive and Kidney Diseases (NIDDK)

The CureGN study is being performed jointly by 4 coordinating centers: The Midwest Pediatric Nephrology Consortium (MWPNC), Columbia University, University of North Carolina, and the University of Pennsylvania. Each center may have several enrolling sites.

IgA Nephropathy Shout Out

The CureGN study has fully enrolled patients into the IgA nephropathy cohort! Thank you to the 676 patients and family volunteers that have joined in the quest to discover new information about these important kidney diseases.

Enrollment

...

Clinical research studies like CureGN depend on you!

As of 4/24/2017:

Total Enrolled: 1820

Totals by disease:

MCD: 374

FSGS: 440

MN: 330

IgA: 676

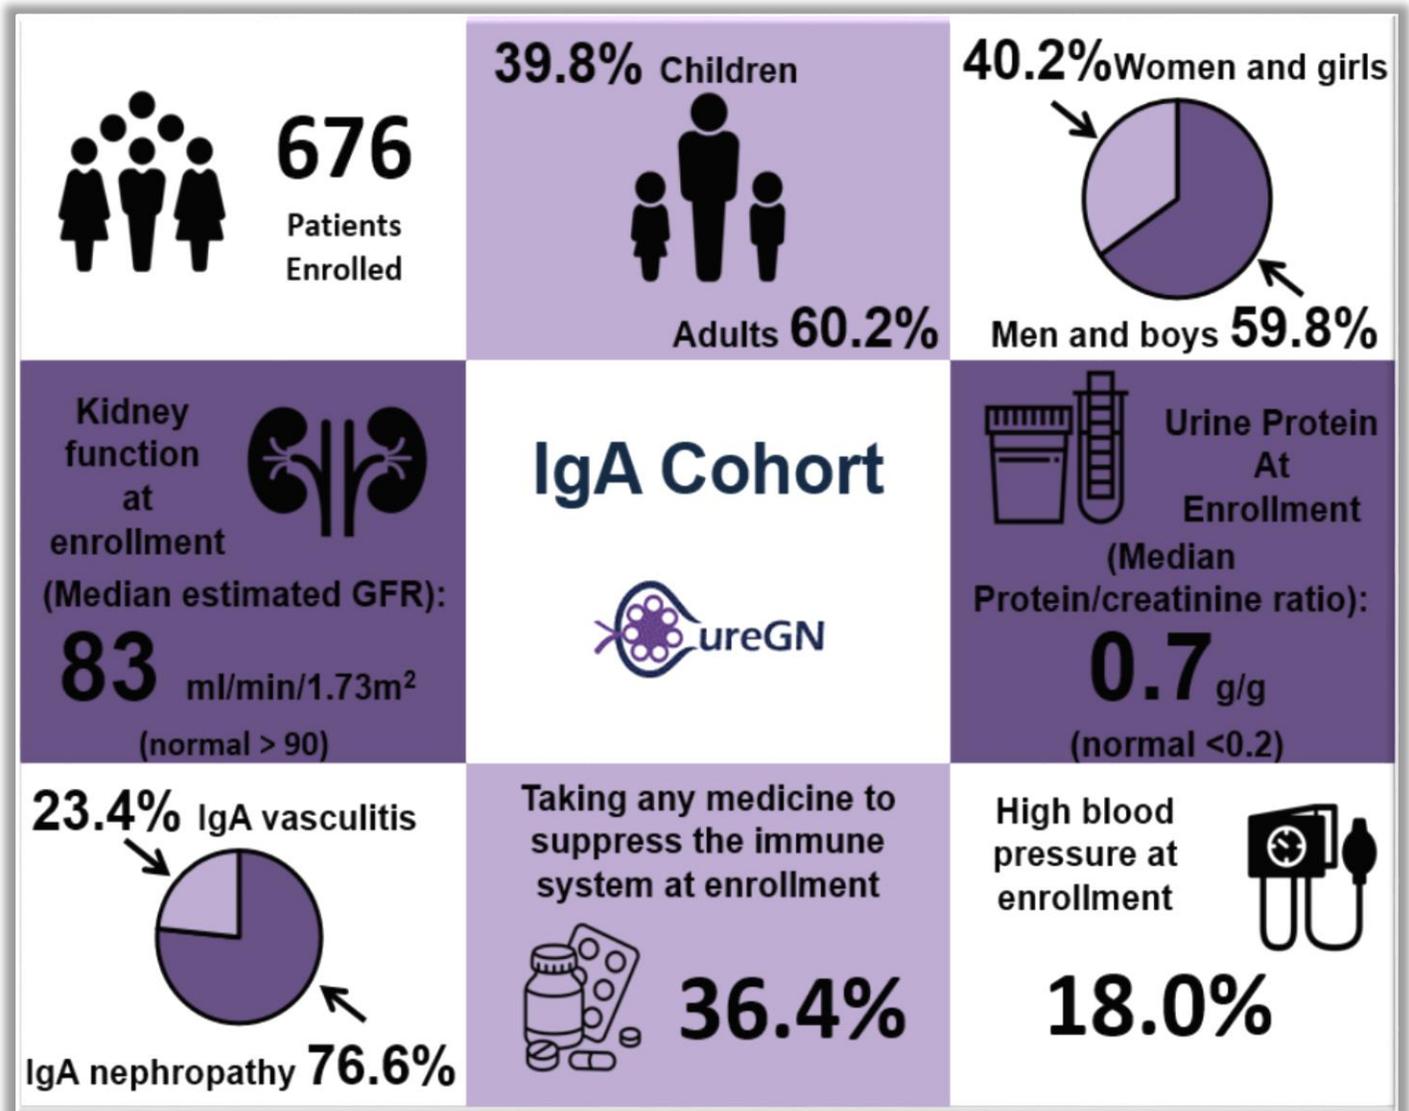

Goal: 2400

76%

Who are these CureGN IgA research heroes?

Filling the cohort is only the first of our responsibilities. Please keep up with your CureGN visits and community so that we can develop new insights into the causes, diagnosis, outcomes, and treatments for IgA nephropathy and IgA vasculitis (also known as Henoch Schoenlein purpura).

What about the other 3 cohorts of Minimal Change Disease, FSGS and Membranous Nephropathy?

As less common diseases, these other cohorts are taking longer to fill. We expect that these groups will enroll into 2018 and even into 2019. Phone a friend, call a neighbor, brag about being part of the solution as we work together to fill in the knowledge gaps for current and future generations of patients just like you.
