

Gain a clear view of your commercial drug discounts

Commercial rebates make up the largest portion of the roughly \$250 billion in drug pricing concessions granted annually. Without a tech-enabled solution in place to validate commercial utilization data at scale, drug manufacturers could be in the dark about the real impact of their contract terms.

Our Commercial Discount Monitoring solution identifies ineligible commercial rebates and brings visibility and confidence to creating and enforcing contract terms, supporting manufacturers throughout the entire contracting life cycle.

Better data for contract compliance

Evaluate

Evaluate incoming claims data to find potential ineligible rebates and make strategic decisions around contract terms and exclusions.

Negotiate

Negotiate and renegotiate contracts throughout the contract life cycle.

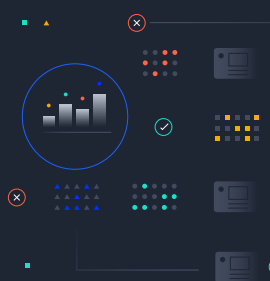

Monitor

Monitor PBM responses and claims statuses in the Exclusion Center.

Enforce

Enforce contract terms and exclusions.

Analyze

Analyze contract performance and exclusion success.

A holistic view across all your drug discount programs

Tech-first approach

Our cloud-based Drug Discount Management solution delivers a seamless, scalable experience with automatic upgrades.

Better transparency and intelligence

Gain insights from an expert technology partner in the 340B space to make better business decisions.

Clarity in contract performance

Compare performance across all your contracts and implement a strategy for those that may need improvement.

More accurate financial reporting

Give your accounting team the data-supported knowledge needed to make informed forecasts and optimize spending.
