

# Utility investigations

## Gold Coast Highway

**From Monday 6 September 2021, John Holland will begin investigations between Broadbeach South station and Burleigh Heads to confirm the location and depth of underground services including water, gas, telecommunications and electrical services.**

Preliminary utility investigations are expected to be completed by mid-October 2021, with detailed investigations to commence from mid-October 2021 to December 2021.

### What to expect

- Underground service investigations at various locations on the alignment between Broadbeach and Burleigh Heads (see map overleaf).
- Investigations will involve the use of concrete cutters, jack hammers, non-destructive digging trucks and drilling machines to cut sections of the road and footpath away.
- Changed traffic conditions may include reduced speed limits, temporary impacts to on-street parking and detours within the works zone. Please follow signage and traffic controller directions.
- Changed pedestrian access around the work zone. Changes will be signed to safely direct pedestrians.
- Some underground investigations will be undertaken during the day, however for safety reasons and to minimise traffic disruptions, most service investigations will be undertaken at night when there is less traffic on the road.
- CCTV inspections and cleaning will take place at some sewers and pipes overnight.
- Nearby residents will be notified in advance of night works.

**While every effort will be taken to minimise impacts, some minor disturbance is unavoidable. Where activities are scheduled overnight, we will endeavour to complete noisier activities earlier in the shift, where possible. We thank you for your patience and understanding.**

### Temporary changes to on-street parking

- Some on-street parking spaces will be temporarily occupied for up to three days and nights to facilitate works. Where possible, the project team will reinstate the parking space each day.
- Signage will be installed prior to the temporary occupation of on-street parking.

### Timing

#### Day shift

- 6am to 6pm, Monday to Friday, from Monday 6 September to mid-October 2021.

#### Night shift

- 6pm to 6am, Sunday to Thursday, from Monday 13 September to mid-October 2021.

## Work schedule

Note: wet weather or unforeseen circumstances may result in changes to the work schedule.

## Preliminary utility investigations

Day	<b>Monday 6 September to mid-October</b> Concrete cutters, non-destructive digging trucks, CCTV inspections, and reinstatement
Night	<b>Monday 13 September to Friday 24 September</b> Visual investigations and site vehicles
	<b>Monday 20 September to mid-October</b> Concrete cutters, non-destructive digging trucks, CCTV inspections, and reinstatement

## Detailed utility investigations

Day	<b>Mid-October to December</b>
Night	Details on the timing of additional utility investigations including night shift will be confirmed and advised closer to the date.

## About the project

The Queensland Government, in partnership with the Australian Government and the City of Gold Coast is delivering Gold Coast Light Rail Stage 3 (GCLR3), extending the light rail network by 6.7 kilometres from Broadbeach to Burleigh Heads, linking communities to business centres, shopping, dining, education and medical facilities.

This city-shaping project will support more than 760 jobs and cater to the Gold Coast's expected population growth in the coming decades.
