We want you to grow with us

Hello! Would you like to join a startup where your passion and creativity will matter more than your title or tenure? A place where everyone communicates at eye-level? An environment where sharing is the focus above all? LivingPackets might be the place for you.

Since 2016, we've been developing the most advanced, smart, secure, and sustainable packaging solution ever: THE BOX. Robust and reusable, with a whole range of services and systems supporting it, we believe it will change the e-commerce industry. Having grown from a small research group in France to an international team of over a hundred brilliant, passionate, and creative minds, we are now very close to our next goal: mass production.

We want to reinvent packaging and logistics, and reimagine the e-commerce industry. We want to drive the world towards a fairer, circular profit-sharing economy.

Will you join us?

QA Engineer (m/f/d)

We offer

- A real cause: help save the world from cutting down millions of trees, cardboard and plastic waste, and transform it into a circular profit sharing economy
- The unique chance to be directly involved in the growth phase of LivingPackets
- A flexible work culture with a focus on growth, passion, fairness, and environmental awareness. A place where your initiative and hard work is valued more than anything else
- An international team of exceptionally talented, motivated, creative and dedicated people
- The option to work in our Berlin, Paris or Nantes offices, or remotely

You bring

- A passion for technology
- Willingness to share and gain automation experience, when necessary
- Quickness in adapting to changes in requirements
- Team player personality with strong communication skills
- Experience with Software Testing tools and technologies
- Nice to have: automation experience in mobile and web applications
- Knowledge of complete STLC
- Fluency in English. German and French are a plus

Your responsibilities

- Proven experience as a Quality Assurance Tester or similar role
- Review and analyze system specifications and expertise in different types of testing
- Test mobile applications, i.e. on iOS and Android
- Conduct post-release / post-implementation tests
- Create logs to document testing phases and defects
- Attend daily standup meetings
- Work with cross-functional teams to ensure quality throughout the software development lifecycle
- Share our values and actively uphold them, while you work on shaping the company and the product together with us
