We want you to grow with us

Hello! Would you like to join a startup where your passion and creativity will matter more than your title or tenure? A place where everyone communicates at eye-level? An environment where sharing is the focus above all? LivingPackets might be the place for you.

Since 2016, we've been developing the most advanced, smart, secure, and sustainable packaging solution ever: THE BOX. Robust and reusable, with a whole range of services and systems supporting it, we believe it will change the e-commerce industry. Having grown from a small research group in France to an international team of over a hundred brilliant, passionate, and creative minds, we are now very close to our next goal: mass production.

We want to reinvent packaging and logistics, and reimagine the e-commerce industry. We want to drive the world towards a fairer, circular profit-sharing economy.

Will you join us?

Team Integration Embedded (m/w/d)

We offer

- ✓ A real cause: help save the world from cutting down millions of trees, cardboard and plastic waste, and transform it into a circular profit sharing economy
- ✓ The unique chance to be directly involved in the growth phase of LivingPackets
- ✓ A flexible work culture with a focus on growth, passion, fairness, and environmental awareness. A place where your initiative and hard work is valued more than anything else
- ✓ An international team of exceptionally talented, motivated, creative and dedicated people
- ✓ The option to work in our Berlin, Paris or Nantes offices, or remotely

You bring

- ✓ Several years of experience in programming c-lang
- ✓ Experience interacting with web related technologies/protocols
- ✓ Know-how with security concepts, and integrating them
- ✓ Experience programming in Rust is a plus
- ✓ Enthusiasm for working in a cross-functional team
- ✓ Good communication skills in English. French is a plus

Your responsibilities

- ✓ Design and implement future-proof APIs
- ✓ Writing reusable,well-tested and well-documented code
- ✓ Writing secure code together with security experts
- ✓ Thinking low-level code, writing high level code
- ✓ Focusing on delivery, and forming repeatable builds that maintain integrity
- ✓ Maintaining code inside a cross-functional and international team
