

# We want you to grow with us

Hello! Would you like to join a startup where your passion and creativity will matter more than your title or tenure? A place where everyone communicates at eye-level? An environment where sharing is the focus above all? LivingPackets might be the place for you.

Since 2016, we've been developing the most advanced, smart, secure, and sustainable packaging solution ever: THE BOX. Robust and reusable, with a whole range of services and systems supporting it, we believe it will change the e-commerce industry. Having grown from a small research group in France to an international team of over a hundred brilliant, passionate, and creative minds, we are now very close to our next goal: mass production. We want to reinvent packaging and logistics, and reimagine the e-commerce industry. We want to drive the world towards a fairer, circular profit-sharing economy. Will you join us?

## Golang Backend Developer (m/f/d)

### We offer

- A real cause: help save the world from cutting down millions of trees, cardboard and plastic waste, and transform it into a circular profit sharing economy.
- The unique chance to be directly involved in the growth phase of LivingPackets.
- A flexible work culture with a focus on growth, passion, fairness, and environmental awareness. A place where your initiative and hard work is valued more than anything else.
- An international team of exceptionally talented, motivated, creative and dedicated people.

### You bring

- Good knowledge about Golang, or willingness to learn it quickly
- Knowledge of SQL and RDBMS - familiarity with NoSQL databases is a plus
- Familiarity with cloud services (preferably AWS) and Docker
- Your top notch priority is to deliver the required features
- You are autonomous and can go forward without having to be pushed
- Discipline in adhering to the development culture (style guide, code documentation, code reviews, tests)
- Fluency in English

### Your responsibilities

- Make features available internally to LivingPackets and THE BOX customers and partners
- Cooperate closely with other teams
- Write and maintain services, along with tests, in a gRPC / JSON / REST / SQL world
- Make decisions on the architecture of a given project

## Join us now

Have we sparked your interest? Then we look forward to getting to know you in a first call, where we would like to learn more about your heart & soul and earliest starting date. If you have any questions in advance, we will be happy to assist you via email at [jobs@livingpackets.com](mailto:jobs@livingpackets.com)
