

We want you to grow with us

Hello! Would you like to join a startup where your passion and creativity will matter more than your title or tenure? A place where everyone communicates at eye-level? An environment where sharing is the focus above all? LivingPackets might be the place for you.

Since 2016, we've been developing the most advanced, smart, secure, and sustainable packaging solution ever: THE BOX. Robust and reusable, with a whole range of services and systems supporting it, we believe it will change the e-commerce industry. Having grown from a small research group in France to an international team of over a hundred brilliant, passionate, and creative minds, we are now very close to our next goal: mass production. We want to reinvent packaging and logistics, and reimagine the e-commerce industry. We want to drive the world towards a fairer, circular profit-sharing economy. Will you join us?

UX/UI Designer & Webflow Pro (m/f/d)

We offer

- A real cause: help save the world from cutting down millions of trees, cardboard and plastic waste, and transform it into a circular profit sharing economy.
- The unique chance to be directly involved in the growth phase of LivingPackets.
- A flexible work culture with a focus on growth, passion, fairness, and environmental awareness. A place where your initiative and hard work is valued more than anything else.
- An international team of exceptionally talented, motivated, creative and dedicated people.

You bring

- Relevant years of work experience solving user experience and user interface problems, ideally in agencies or startups
- Strong portfolio of thoughtful interface design projects, showcasing creative and innovative website and app designs
- Professional knowledge in front-end development using Webflow and solid knowledge of HTML, CSS, and JavaScript
- Proficiency with common visual design, interaction design, and hand-off tools (Adobe CS, Figma/Sketch, Principal, ProtoPie, Zeplin)
- Strong visual design skills, a deep interest in digital trends, and familiarity with design principles and patterns for mobile applications and website design
- Ability to translate complex ideas into actionable, tangible output and to communicate your processes, concepts, and decisions to fellow designers, developers, product owners and other stakeholders inside and outside the company
- Fluency in English. German and/or French language knowledge is a bonus

Your responsibilities

- Combine storytelling with analytics to help users access information and functionality in a simple, understandable, and empathetic way
- Create user flows, wireframes, prototypes, and pixel-perfect screen designs for web and app
- Build and maintain our websites with state-of-the-art interaction, animation, and dynamic content in Webflow
- Support to build and refine our design system for web and mobile applications. Provide detailed design documentation and deliverables to support and enable collaboration and implementation efforts within cross-functional teams
- Work in close collaboration with agile product teams throughout the development process from concept to launch
- Be a proactive member of the Design team, sharing ideas and knowledge. Offer constructive feedback in meetings, discussions, and at design reviews
- Advocate for user needs: apply an empathetic design approach to develop creative, consistent concepts and experiences across platforms

Join us now

Have we sparked your interest? Then we look forward to getting to know you in a first call, where we would like to learn more about your heart & soul and earliest starting date. If you have any questions in advance, we will be happy to assist you via email at jobs@livingpackets.com
