Swell

Full height acoustic interior wall cladding

SWELL is a lightweight, acoustic wall cladding solution with a unique height of 2.7m that offers a horizontally seamless solution. Swell introduces softness into the workplace indicative of loose curtaining; a timeless wall finish with both acoustic and environmental properties.

Manufactured locally using traditional tooling techniques, Swell is made using 60% recycled bottles.

Swell is the inaugural product within 'Editions'; The Collective's new in-house product division dedicated to market-led products which are made in the UK and use optimum production techniques.

Available in 31 trend driven colours

Made in the United Kingdom

Lead time 4 - 6 weeks
