Managed Services

WHAT WE DO

Comprehensive Suite of Smart Technology & Threat Intelligence Services

At Opticca,we understand that safeguarding your technology infrastructure is paramount in our digital landscape. Our suite of managed services is designed to extend your IT team's capacity.

About Us

Our purpose is to ensure that companies everywhere recognize the impact of cybersecurity and take control to protect their software development environments.

Web Application Firewall as-a-Service (WAFaaS)

Secure your web applications and APIs without the complexities of managing a WAF infrastructure. Our fully managed WAFaaS solution ensures reliable, scalable, and effective protection for your digital assets, saving you valuable time and resources.

CDN-as-a-Service

Harness the power of leading public CDN technology on your private network. Experience benefits like Dynamic Site Acceleration, instant invalidation, livestreaming, and real-time visibility, all while eliminating the hassle of in-house maintenance.

Enhancing Security Posture

At Opticca Security , we specialize in providing advanced services to improve your security posture and meet regulatory requirements. Our security experts are equipped to assist you in formulating a risk management strategy, incident response, and everything in between

Software Composition Analysis (SCA)

Our SCA service focuses on third-party code dependencies, particularly beneficial for applications with numerous open-source libraries. SCA is tailored to your programming language, offering comprehensive vulnerability assessment and mitigation.

Empowering Security Champions

We empower your security champions by providing them with the necessary tools and knowledge to ensure the resilience of your applications. Our services enable you to build an AppSec culture and enforce custom security rules, configurations, and advanced threat detection.

Interactive Application Security Testing (IAST)

IAST combines the strengths of SAST and DAST, precisely identifying vulnerabilities within your code and their exact locations. This method enhances security while streamlining remediation efforts.

Opticca Security is dedicated to helping you secure your apps. Our managed services enable you to focus on your core business while we handle the complexities of application security. With our expertise and best-in-class technologies, you can trust us to protect your data and build resilience.
