

latex

100% Natural

Wellington Beds only use 100%
Natural Latex Rubber.

Latex Rubber:

- Is an environmentally friendly product offering superior mattress air circulation.
- Is non allergenic and irritant free.
- Is a highly durable product that will offer years of support.

Natural Latex is made by extracting sap from the rubber tree (Hevea Brasiliensis).

The extract then goes through the Dunlop manufacturing process to create the natural rubber product we use in our mattresses.
