

CHARTER OF ECOLOGICAL COMMITMENT

CRUSO'S COMMITMENT TO CONSTANTLY REDUCING ITS
ECOLOGICAL FOOTPRINT :

- . DESIGN **DURABLE** AND **RESISTANT** PRODUCTS
- . MANUFACTURE IN **EUROPE**
- . REDUCE **PACKAGING** AND **TRANSPORT**
- . USE **SUSTAINABLE** MATERIALS

We want to offer the best design possible to our customers. It means having high quality standards for conception and production. That is why we care about working with talented industrial designers that share our philosophy. We make sure that their creations reach the market in the most responsible way possible. Our production process follows these simple rules : First, recycled or recyclable materials for both our products and their packaging. Secondly, European production and sourcing for limited CO2 emissions during transport.

As a young design brand, our duty is to put out furniture pieces that do not follow trends and will last through generations. We believe in simplicity in design and durability in construction.

Olivier STÉVENART, Founder of Cruso
