

SWITCHED ON

Our Fuel Switch Solution

Switch to sustainable homes and cheaper fuel bills

IMPROVING HOMES FOR THE FUTURE

The most cost effective way to increase the SAP rating across your housing stock is through fuel switching.

Many households across the UK live in fuel poverty, unable to afford the high costs of electricity, coal, oil or LPG.

For many of us, gas central heating is a given, but today approximately 18% of the UK population are living off gas, which means about 4.4 million homes may be affected.

Gas heating is not only a cost effective method of heating, it is also more energy efficient and environmentally friendly than other fossil fuels.

At MPS Energy, we believe everyone deserves the right to a warm home, which is why we are providing a dedicated fuel switching solution, Switched On.

Switched On is our unique proposition that enables us to connect residents' homes to mains gas.

Annual household energy savings can be up to **£530** for homes moving from electricity, **£460** from LPG, **£380** from solid fuels and **£110** from oil.

WE DO ALL THE LEG WORK

We will apply for funding on your behalf so you don't have to.

Leveraging our unique position, we will incorporate funding initiatives to support the application.

AFTER THAT, IT'S EASY...

The potential benefits for residents are significant. MPS Energy strives to provide residents access to more affordable and sustainable energy. The 'Switched On' programme creates an opportunity for social housing providers to deliver better value to residents.

THE NITTY GRITTY

Where the property is less than 23m from the network connection will be free of charge.* After we configure the connection, we will install and manage the central heating to the properties.

*Subject to qualifying criteria

MPS Energy is part MPS and specialises in the provision of energy services in the social housing sector. MPS has been caring for residents' homes for over 25 years. Our people are experts in estate management and property maintenance, as well as all the main building and specialist trades.
