The world's first Fava bean chunks and mince

## The world's first Fava bean chunk!

Beanit is the world's first plant-based protein product made from Nordic Fava beans. We source and produce in Finland, where the Fava beans are superb in taste and nutrition thanks to our intensive bright summer and clean nature.

## Our hero: the Nordic Fava bean

The Fava bean (also known as Broad bean, Horse bean or Faba bean) used to be the most important staple food in the Nordics throughout history. It grows well in our climate, has a subtle, neutral earthy flavour and is packed with nutrients – most of all protein. There is still a lot of Fava beans cultivated in Finland, but today most is used as a raw material for animal feed. That is, until we decided to change that game. The Fava bean is not an easy ingredient to work with, but here we are!

## Only three ingredients

Our Fava bean chunk and mince only contain three ingredients: Nordic Fava beans, pea protein and pure water! No additives, no funnies. To the final product we add vegetable oil with herbs and spices for rich taste and easy cooking. Our products contain no soy or gluten and they are totally vegan friendly. The protein content is high: 24 %.

## Enjoy the taste and the rest will follow

Our brand new Fava bean chunky bites and mince are tender on the inside, yet wonderfully crispy when fried. They work perfectly as an ingredient in all your favourite dishes, for example stir-fries, pastas, and salads.

We are not trying to replicate meat - we simply want to make food that tastes so good that you don't feel like you are missing out on anything when making a sustainable choice. Our food is rich, fulfilling and delicious. In our communication we focus on the good in life – no preaching, no additional eco-anxiety, only delicious solutions. Just enjoy the taste, and the rest will follow.

## Sustainable supply chain, customizable in your market

We produce our fava bean products in Finland, one of the purest countries in the world. Our brand new factory is located in Western Finland, where the soil is optimal for cultivating the beans. We use patented technologies and will be FSSC 22000 certified in 2020. To make things even better we can ship our products in ambient stable, long shelf-life, efficient packaging for our partners to customize and commercialize around the world. The chunks can be repacked and sold ambient, chilled or frozen both in retail and foodservice. We will also happily help with our best-in-class consumer insights and conceiving capabilities.

## Fava bean components for your own products

We also provide other fava bean components for further processing by our partners. Available for shipping are precooked Fava beans, crushed precooked Fava beans and textured Fava bean mix. Contact us for more information!
