# Simplify direct deposits. Build lasting relationships.

Remove friction by making it easy to set-up direct deposits.

Establishing the checking account as the primary account for direct deposit is arguably the most important step in solidifying primacy and profitability. Our secure Direct Deposit Widget makes it easy for account holders to connect directly with payroll providers, maximizing direct deposit penetration.

Who pays you? ✕

🔍 Employer or payroll provider

| Popular | Employer | Payroll | Gig |

ADP	Workday	DoorDash	Walmart
Paycom	Uber	Amazon	DailyPay
Paychex	Lyft	Dayforce	myPay

Embed the widget with one click

Add the Direct Deposit Widget into a microsite page by selecting it from our widget library. Direct deposit enrollments will automatically be directed to your institution.

Update direct deposits fast

Customers and members don't need to fill out PDF forms or rely on HR. By selecting their payroll provider or their employer, they can set-up and replace direct deposits in seconds. Updates may take effect as soon as the next pay period.

Guard against identity fraud

By verifying customer and member information against employers' payroll systems, the Direct Deposits Widget helps you prevent identity fraud and comply with anti-money laundering (AML) and know your customer (KYC) rules.

HOW IT WORKS

Who pays you? ✕

🔍 Employer or payroll provider

Popular   Employer   Payroll   Gig

ADP | Workday | DoorDash | Walmart
Paycom | Uber | Amazon | DailyPay

Step 1

Select employer or payroll provider

Confirm paycheck distribution

🏦 **MyFI**
··0123   100% ›

Step 2

Enter login credentials and distribution percentage

✓

Your paycheck is now linked to MyFI

Step 3

Direct deposit is moved to your institution's account
