

+ Dressing placement for the prone patient

ALLEVYN[◇]
Foam Dressings

The shapes, types and number of dressings pictured above are an illustration of best practice. Your hospital may not yet stock all versions of the ALLEVYN Foam Dressing. For questions on ordering, contact your Smith + Nephew representative.

Things to remember when proning patients

- When in the prone position, the eyes should be covered with foam goggles or an ALLEVYN GENTLE BORDER Foam Dressing to prevent corneal abrasion
- Don't forget to add padding to the safety straps. ALLEVYN LIFE Foam Dressings can be used for this purpose
- When in the supine position, place ALLEVYN LIFE Foam Dressings on pressure points, then turn patient to prone position
- "LDA" refers to "lines, drains, and airway". Be sure to check the position of the LDA on the patient and add foam dressings as needed

ALLEVYN[◇] family

ALLEVYN LIFE

| Product number | Dressing size: border to border | Pad size |
|----------------|---------------------------------|-----------------|
| 66801067 | Small 10.3cm x 10.3cm | 5.1cm x 5.1cm |
