

bioniq

THE PIONEERING
HEALTH MONITORING
SYSTEM SERVICE
COMES TO THE **UAE**

bioniq

Discover a new era of health optimization with the launch of bioniq LIFE - a pioneering research-based health system.

Experience a new and improved you with the launch of bioniq LIFE, an innovative, research-based health system which evolves with you on your journey to improved health. Brought to you by the health tech innovators bioniq, this subscription-based service cross-analyses and tracks your health and nutritional status, providing in-depth information and recommendations based on your personal data, blood test results and the unique bioniq algorithm.

Setting the benchmark in bespoke health optimization, bioniq LIFE takes the hassle and guesswork out of finding the right solution for you.

Developed by leading experts, this pioneering system gives you a detailed insight into your current health status and provides you with a tailored supplement regime, delivered directly to your door. As a result of regular testing and monitoring, this system will evolve and adapt throughout your bioniq journey, in order to optimize your health and wellbeing.

bioniq

Artificial intelligence lies at the heart of this bespoke service, due to the unique algorithm developed by bioniq, which is based on the biochemical analyses of over 2 million data points, taken from 30,000 blood tests conducted in 12,000 participants. This algorithm will not only help determine what supplements you should be taking, but also what parameters need to be tested as you progress on your bioniq journey, including blood, microbiome and genetics to give a full analysis of your health status. These tests, which are conducted by specialists in the comfort of your home, analyze over 50 principle blood test parameters, such as cholesterol, hormone levels and insulin, which all have an impact on your general health and wellbeing.

Comprised of up to 120 components, the bioniq LIFE Swiss patented formula includes probiotics, vitamins, enzymes and micro-elements. It is blended into tiny granules which release their active ingredients into the bloodstream during a sustained period to enhance absorption in the body. Simply take with water, or sprinkle on yoghurt or in a smoothie twice a day to best enjoy all the vitamins, minerals and micro-elements you need throughout a 24-hour period.

bioniq

In addition to your formula, you will also be provided with ongoing support and advice via online consultations with qualified nutritionists and will undergo bi-monthly tests to ensure that you get the most out of your bioniq journey. For further support, you will have access to a secure online dashboard which allows you to view your personal results and health recommendations, as well as track changes in your overall health and data.

If you are looking for a convenient, effective, ongoing and evidence-based way to optimize your health and nutritional status, then bioniq is your answer. It offers a new era of health optimization, combining cutting-edge technology, premium products, expert advice and artificial intelligence to deliver a health-tech system, set to take the UAE health and wellness market by storm.

In the UAE, bioniq chose Freiburg Medical Laboratory (FML Medical Lab) as their first partner, who will support all of the company's esteemed clientele with a personalized health monitoring system delivered within the comforts of their home, along with other leading health care providers in the region.

bioniq

“Our company aims to maximize the quality of people’s lives making health accessible and actionable for everyone. We are excited to be bringing our data-driven personalized solutions to the UAE and the entire GCC region, which has proven to be one of the most forward-thinking places in the world”

Vadim Fedotov

CEO and Co-founder

bioniq

How did we manage to do this?

The bioniq database consists of more than 2,000,000 biochemical parameters obtained repeatedly from 12,000 people over the past 8 years. This base is constantly updated, is unique, and is one of the largest in the world.

Thanks to unique algorithms, the system compares each client's blood parameters with a database and, based on this analysis, develops a set of elements and dosages, as well as a system of subsequent checks - a list of parameters that should be examined the following time, such as what is in doubt, and what is worth paying attention to and requires additional tracking.

bioniq

Our granules

bioniq granules are manufactured in Switzerland using proprietary technology, and are approved by the Therapeutic Products Agency (SWISSMEDIC, SWISS AGENCY FOR THERAPEUTIC PRODUCTS).

For the basis of bioniq granules, the inner part of the seeds of the Indian acacia (guar) is used. This positively affects intestinal microflora. Granules do not contain gluten, dyes or flavorings, and are also suitable for vegans.

All the necessary components of the granules are absorbed in one go, as bioniq granules enter different parts of the intestine and do not mix with each other, which maximizes the bioavailability of the active ingredients. This allows you to take all the components of the bioniq complex at the same time. Unlike standard dietary supplements and vitamins, granules release their active ingredients over a 12-hour period (instead of 4 hours). Therefore, taking your formula 2 times a day, the micronutrients are constantly and completely absorbed.

bioniq

Scientific base

bioniq has conducted 24 clinical trials, including randomized controlled double-blind clinical trials, which are recognized as the gold standard (Good Clinical Practice GCP) in clinical trials of medical programs and drugs. These results confirmed the cognitive and physical improvements of the body, as well as the anti-aging effect.

The results are published in international peer-reviewed journals and presented at scientific conferences.

All components of the bioniq formula are 100% Swiss-made. The formula is delivered from London directly to customers.

All components have international safety certificates.

bioniq

Meet the doctors

"bioniq's system offers users a chance to understand their body in more detail and learn how to optimize function»

DR SEBASTIAN KUNZ
