

Middle Go Developer at Peaq Technology GmbH

Starting Date: May 2021

Weekly Hours: 40

The Role

As Middle Go Developer you will be responsible for the backend development of new and ongoing projects.

Minimum Qualifications:

- Go Developer with +4 years experience in backend development and at least 1.5 years of experience in Go.
- Strong practical experience with MongoDB, MySQL and Redis.
- Practical experience with Docker containerization.
- Experienced with WebSockets.
- Deep knowledge of Application Lifecycle Development.

Preferred Qualifications:

- Good knowledge in one of these languages: Ruby, Elixir, Rust, C++, Erlang, Python.
- Bachelor/Master's degree in engineering, maths, physics, computer science or equivalent.
- Familiar with agile software development (Jira, Redmine, Confluence).
- Practical experience with TDD.
- Practical experience with cloud services.
- Familiarity with Postgress.
- Experience with RabbitMQ, Protobuf.
- Experience with Web Services (REST, RPC, gRPC).

Responsibilities

- Developing backend of our high-loaded Web applications.
- Working with our blockchain API.
- Developing services without and with containerization.
- Working and maintaining different types of databases.
- Developing unit tests when needed.
- Communicating effectively and documenting the developed software.
- Working closely with a team in an agile environment to ensure high-quality products.

What we offer

- The opportunity to contribute to innovative projects in a new and exciting industry that has the potential to change our world positively.
- High growth potential.
- Warm and open corporate culture at a truly international company with many different nationalities.
- An environment that values freedom, autonomy, team spirit and open communication.
- Flexible working hours.
- Base salary + commission.
- Office space in the heart of Berlin.
- Soft Drinks and coffee (We know how important caffeine can be).
