

NOTABLE FEATURES

REASONS WHY CONSTELLIX IS A BETTER ALTERNATIVE TO DYN

UPTIME

Constellix is the only provider in the industry to offer true 100% uptime regionally and worldwide since inception. Constellix owns the largest authoritative DNS network in the world. Backed by 20 PoPs worldwide and located at crucial peering points for optimal connectivity.

DNS METRICS

Constellix offers the most advanced query analytics and insight to your DNS traffic in the industry. Real-Time Analytics allows you to export system logs, detect potential attacks, identify stale or unused records, and pinpoint a CDN that may be making excess requests.

GEODNS ROUTING

Constellix offers a powerful set of tools that allow you to segment your traffic based on your users' location or network. GeoDNS empowers you to build your own CDN, load balance between multiple systems, block malicious or unwanted traffic, and optimizes routing for different networks or regions.

AI / ML ALERTING

Constellix is the only provider in the world to alert you of suspicious spikes with our Real-Time Traffic Anomaly Detection. Receive automatic notifications if you are encountering a DDoS or malicious spam attack, internal systems are configured incorrectly, or if you are experiencing server issues.

DNS FAILOVER

Our enterprise monitoring suite, Sonar, automatically moves your traffic from unavailable resources to healthy ones. DNS failover is intrinsically integrated with GeoProximity, global load balancing, traffic steering, round robin, and latency load balancing. Failover is supported for A, AAAA, ANAME, and CNAME records.

Multi CDN CAPABILITIES

Constellix utilizes real-time machine learning to dynamically route traffic to the best CDN for each user. Our unique CDN dashboard allows you to filter and visualize data using a variety of metrics. Receive instant notifications with our built in failover if any CDN goes down and get alerted when they are up and running. Double your coverage map, ensure 100% uptime even during provider outages, and view significant performance gains. The reporting uses our ITO feature and RUM to calculate the fastest performing CDN in your desired region, therefore allowing you to obtain a granular insight to the performance into your CDN (constellix.com/products/cdn-performance).

100% uptime over the past 12 months.

Constellix has 100% uptime service history for 9+ years.

DYN has had several outages in the past 12 months

Easy wizards and import utilities

IP Anycast DNS network (DNS resolution at the edge)

24/7/365 Technical Support

Multi-factor authentication and SSO

(only with paid services)

DNS Failover on A / AAAA / CNAME/ and ANAME records.

Limited records and features available

Geo DNS capabilities

Limited

MultiCDN capabilities

Full API Capabilities

Only with paid services

GUI Interface for DNS management

DNS Templates

Vanity Name Servers

(only with paid account)

Real-Time Logging of DNS queries

DNS query reporting

(basic features only)

Weighted Round Robin

ANAME (Alias records)

(limited features)

Multi-User Access

(only with paid account)

Real-Time Anomaly Detection (artificial intelligence/machine learning)

Top tier DNS speeds

Dedicated DNS specialists and support
