Digital Asset: Solving Real World Issues with Smart Contracts

13:45-14:05

Join this session to hear first hand from the developers that are solving real-world problems with Daml, a platform for building multi-party applications from Digital Asset. From experimenting with various tech stacks, to ultimately selecting Daml to create their project, we gathered a few developers to share their experiences using the technology. Learn about the problems they faced from fragmented data silos, and how they came to the same conclusion that using Daml was the best way forward to resolve the challenge. From this session, you will gain a better understanding of the types of problems that can and should be solved using distributed ledger and see just how easy it is to write smart contracts with Daml.

Crypto - The Buzzword for FinTech

14:15-14:30

1. What are the latest trends and insights on crypto
2. How are consumers and businesses using digital currency?
