GHA For Federal Agencies: Framework, Training, and Accreditation

As recent unprecedented times have changed the workplace landscape, it is essential that Federal Agencies prioritize the safety, health and wellbeing of their employees while still meeting the demand and needs of day-to-day business with contractors, and visitors. Federal Agencies are seeking guidance on how best to navigate and meet this demand - and employees need reassurance that their respective Agency has the expertise, plans, and resources necessary to do so.

Global Healthcare Accreditation (GHA) For Federal Agencies sets the standard for Agencies that are ready to build employees' confidence and trust as they navigate the ongoing return-to-office challenges resulting from COVID-19.

GHA For Federal Agencies provides:

Third Party Validation against best practices, regulations, and Federal Agency guidelines (GSA COVID-19 Workplace Safety Plan, revisions thereto, and future rollout plans by the Safer Federal Workforce Task force)

Building of Employee, Contractor, and Visitor Trust & Confidence through informed policies & procedures, risk mitigation and prioritization of workplace safety, health, and well-being

Benchmarking amongst Federal Agencies through monitoring and measurement tools to determine need for, and provision of consultative coaching

Identification and Mitigation Plans for future risks related to Federal Agency safety, health, and wellbeing

GHA For Federal Agencies Framework, Training, and Accreditation support compliance with existing return-to-office strategies, establish sustainable culture for safety and sanitation, and provides measurement tools and reporting for the aggregated set of processes and policies implemented at the Federal Agency.

The GHA For Federal Agencies Annual Plan assures continuous education, training, virtual resources, and benchmarking are available to address the evolving workplace needs. And Accreditation demonstrates to employees, contractors, and visitors, and other stakeholders that Federal Agencies' operational protocols and practices have undergone external review and reflect best practices designed to keep people safe, which in turn builds confidence and trust in each Federal Agency.

The elements of the GHA for Federal Agencies framework, training, and accreditation are based on the most up-to-date research available and are designed to build upon and enhance Agency regulations and guidelines. GHA for Federal Agencies is specifically designed to provide a framework for risk reduction and to build resiliency to meet future safety and health challenges.

These are important factors in bringing employees back to work, reducing vaccine hesitancy, retention, lower stress in the workplace, increase behavioral health, and building trust and confidence. Thus, GHA For Federal Agencies validates an Agency's commitment to safety, health, and well-being, building trust on the part of their employees, contractors, and visitors.
