

# Small Format / Indigo File Requirements

Submit all files as PDF.

File dimensions should match the estimated size.

Please provide files at 100% scale.

All files need to have a minimum of .25" bleed.

All raster images at 300dpi maximum at final size.

CMYK files only with profiles embedded.

Dielines should be provided as a separate layer and labeled as a spot color "Dieline".

# Wide Format File Requirements

Submit all files as PDF.

File dimensions should match the estimated size.

Please provide files at 100% scale or 10% scale as best alternative. Always note what scale your files are (make sure that your file will scale proportionately to final print size including bleed). If file is set up at reduced size (ie. 10%), ensure that at final size, the resolution of raster images end up at 100dpi minimum.

All files need to have a minimum of .25" bleed.

All banners need to have a minimum of 1" bleed.

CMYK or RGB with profiles embedded. adobeRGB1998.icc preferred for larger color gamut.

Dielines should be provided as a separate layer and labeled as a spot color "Dieline".

Embed all fonts. Expand all fills and strokes.
