

ULTRA LOW VOLUME FOGGER

Use the VS-500 for disinfection, pest control, odour control and plant protection.

The VS-500 works by expelling a fine, almost invisible mist into the atmosphere which eventually settles on all surfaces including those impossible to reach by conventional methods.

The machine is compact, and robust, making it ideal for constant commercial use, whilst equally suited to an office or domestic environment. The large 5 litre tank and powerful 1400w 230v electric motor allow the covering of larger areas with ease.

Whilst comfortable as a hand held fogger the VS-500 can be positioned on the floor or counter-top. The cone is height adjustable allowing the fog to be directed for best effect.

Setting the flow rate control at level 2 will produce a dry fog, suitable for areas such as offices or where textiles or other sensitive materials / merchandise are exposed.
(Setting 2.25 = 10 micron spray)

SPECIFICATION

Motor	1400W, 220V AC 50Hz	The ability to adjust the fogger output from 9 µm up to a fog 49 µm, and flow rate up to 49 litres per hour makes this machine suitable for the application of disinfectants, biocides, fungicides and pesticides.
Tank Capacity	5litre	
Output FlowRate	0-49 L/Hr	Regular fogging with an approved disinfectant such as Huwa-San will help prevent the cross-infection of viruses such as MRSA, COVID 19 Coronavirus (human and feline), and other pathogens.
Droplet Size	9-49micron	
Empty Weight	5.3Kg	Ideal for use in office spaces, offshore cabins, vehicles, Aircraft cabins etc
Dimensions	50x17x50 Cm	Fog using Huwa-San at between 3 and 8% for optimal kill rate
