

Using Technology in the Classroom

Goals for Today

- 1 Understand why we need to integrate tech into the classroom
- 2 Identify active learning strategies
- 3 Review and experience tech-enhanced active learning
- 4 Address difficulties using tech in the classroom
- 5 Take steps to integrate a tech-enhanced active learning strategy into a lesson

“Integrating technology with classroom practice can be a great way to strengthen engagement by linking students to a global audience, turning them into creators of digital media, and helping them practice collaboration skills that will prepare them for the future.” -*Edutopia*, 2012

"We might think of active learning as an approach to instruction in which students engage the material they study through reading, writing, talking, listening, and reflecting. Active learning stands in contrast to "standard" modes of instruction in which teachers do most of the talking and students are passive."

"What Is Active Learning? - University of Minnesota Twin Cities." 2008. 13 Jul. 2015
