## FILLING/DRAINING DIRECTIONS

### Filling the tank:

- Fill the tank up to the 'fill' line with clean water.
- Pour chemical into tank
- Switch on machine ensuring the switch is illuminated and wait for solution to heat.

### Emptying the tank:

- It is recommended that chemical is replaced once a month.
- Turn the machine off at the wall socket and unplug.
- Carefully move tank to the nearest waste drain (**NEVER A RAIN WATER DRAIN**).
- Remove end cap using the two levers and attach drain kit, ensuring levers are fully closed.
- Direct the other end of the drain kit into the waste drain.
- Open ball valve to release the chemical into the waste drain.
