

ENFORCE COMPLIANCE

The screenshot shows the ACADIS Compliance Monitor interface. At the top, there is a search bar and a user profile for Johnson, Mark. The main navigation menu includes Home, People & Resources, Registration, Training, Testing, Compliance (selected), Scheduling, Housing, Reports & Data Tools, Admin, and Help. The Compliance Monitor section displays a table of certifications with columns for Name, Organization, Certification, Days to Expiration, Expiration, and Certification Status. A filter for 'Expired Within 30 days' is applied.

ACADIS COMPLIANCE

During a crisis response, when there's a gap between "expectations" and "experience," failure is not only an option, but a likely outcome.

Fortunately, **Acadis Compliance** helps you close that gap — with confidence and conviction.

Training and certifications, documentation, security clearances, age — whatever the unique policy specifications, you can use Acadis Compliance to customize job requirements. Plus, you can easily track personnel, resources (like vehicles or service animals), organizations and facilities against certification or recertification criteria. So you'll always know if your entire team is ready to respond, ready to advance, and ready to lead.

What used to be an incredibly time-consuming, paper-based process is replaced by an automated tool that helps you continually track primary and advanced certifications. No matter how complex or intricate the job requirements, you have an always-on virtual assistant at your side providing alerts that help ensure all compliance requirements are met.

KEY BENEFITS

Ensure Compliance: Maintain essential safety and accountability standards by managing the compliance of personnel, facilities, organizations and inventory

Save Time: Assign active periods to qualifications and certifications, and then easily manage impending expirations and renewals (by, for example, planning training events for groups with expiring certifications)

Customize Content: Include as many compliance requirements as you like through user-defined fields, and design your own certifications for individual professionals and groups

Stay Current: Make the most of management dashboards and reports that help ensure all personnel (including instructors) are in compliance with all key qualification and re-qualification/certification criteria

Maximize Efficiencies: Allow your team members (through the Acadis Portal) to see, print and renew their certifications online with full audit support — freeing you to spend less time administering paperwork and more time perfecting your training programs

"Automating our provider and resource certification process saves us significant time and money, and also helps us better serve our first responders. Additionally, this is another crucial step in providing vital response capability information including which personnel, EMS providers and vehicles are certified as ready for deployment in the case of emergency."

— Indiana Department of Homeland Security
