CONNECT CASES

ACADIS CASE MANAGEMENT

At a time when litigation against public safety organizations seems all but inevitable, it's more important than ever to have a single, streamlined method for maintaining legally defensible records about your own personnel.

Acadis Case Management lets you add, track, and manage cases that may require formal investigation—including complaints, claims, employee conduct—to submit through Acadis. Moreover, users with the appropriate rank can view, add to, delete, and edit cases as necessary. This includes the option to attach documentation relevant to the case.

This means that in a matter of minutes, all records and information connected with a case can be reviewed thoroughly and efficiently.

Acadis Case Management helps your organization maintain consistent case records with all relevant information, including points of contact. When legal defensibility is of the utmost concern, Acadis Case Management provides a way to manage all relevant case information for quick and timely access—no matter what the circumstances.

KEY BENEFITS

Optimize Data: Reduce confusion about case progress and details with unified naming conventions and case status indicators.

Save Time: Rather than relying on legacy systems that separate names, documents and details, take advantage of a single module that holds all this information in one place for access any time, from anywhere.

Dig Deeper: A single location for all case-related data means a more convenient—and more reliable—method for investigating the details of a case.

Stay Current: Rest assured that because Case Management contains all the information you need about a case, you won't have to worry about missing paperwork or other data—and that what you see is the most recent data available.
