

Cloud Engineer

m / w / d

You as a member of our team

We are looking for a Cloud Engineer who is passionate about new technologies.

Like working on different types of projects and always looking for the best way to solve a problem? An international team structure excites you? The quality of work really matters? You are looking to continuously further your knowledge? Then you are at the right place!

Spektrum 44

We are a young team dedicated to the highest quality — but never take ourselves too seriously. With fun, respect and balance, we all work together to inspire our international customers from the automotive, tourism & luxury industry.

Your responsibilities

- Working close with Project Managers and other developers
- Use Terraform to define cloud infrastructure
- Working on client and internal projects as cloud expert
- Working on best practices for our Cloud stack
- Constantly improving cloud knowledge
- Working with different CI/CD tools: Jenkins, Gitlab pipelines, Bitbucket pipelines
- Be part of cloud architecture process to build secure and scalable infrastructure

Expectations

- At least 1.5 year of Cloud development experience with AWS, Azure or GCP
- Terraform is your main tool for infrastructure provisioning
- You are driven by orchestration and automation, and before you build something you think of a way how to automate it
- You have experience on projects that are microservice and serverless driven
- Python and Java are preferred languages, but experience in any other language is sufficient
- Ability to collaborate with multiple teams, stakeholders, and clients in the design, integration, and implementation of cloud-based solutions
- You have experience with at least 1 container orchestration tool — developer and admin role — preferred are ECS or Kubernetes
- You have awareness of infrastructure security and cost
- You have basic networking knowledge - e.g. you are able to setup and administer VPC, VPN, etc.
- You are following best industry practices in your work, and you are up to date with latest changes
- Proficiency in English is must. Proficiency in German is plus.

Benefits

Soft Facts

- The range of customers will be as diverse as the tasks
- High level of personal responsibility
- Young team with fast decision-making processes and flat hierarchies
- Close knit atmosphere with a feel-good office environment (kitchen, coffee bar etc.)

Hard Facts

- Full-time position
- Competitive compensation package with performance driven bonus opportunity
- Company pension plan with subsidies above the statutory rate
- Good accessibility with central location in Munich
- Workstations with up-to-date software and hardware
