## **NOTE 2 SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES**

### **General principles**

The Company maintains its books and records in Euro (“EUR”) and prepares its annual accounts in accordance with applicable laws and regulations in Luxembourg as well as with the generally accepted accounting principles in force in the Grand Duchy of Luxembourg. The annual accounts are prepared in accordance with the going concern principle.

The provisions of the law of December 18, 2015 on annual and consolidated accounts and the grand-ducal regulation of December 18, 2015 on the layout of balance sheet and profit and loss accounts, amending the law of December 19, 2002, have been followed in the preparation of these annual accounts.

The layout and the headings of certain balance sheet and profit and loss account captions have been modified accordingly. Some comparative figures have been reclassified for the same reason.

### **Main valuation rules**

The main valuation rules applied by the Company are the following:

#### Debtors

Debtors are stated at their nominal value.

A value adjustment is recorded when the estimated realizable value is lower than the nominal value. The realizable value is estimated on the basis of the information available to the Board of Directors. These value adjustments are not continued if the reasons for which the value adjustments were made have ceased to apply.

#### Derivative financial instruments

The Company is engaged in hedging activities, in particular the hedging of foreign currency exposure. Derivative financial instruments are initially recorded at cost. In the case of hedging of an asset or a liability that is not recorded at fair value, unrealized gains or losses are deferred until the recognition of the realized gains or losses on the hedged item.

Premiums of the hedge deals are accounted in other debtors.

#### Foreign currency translation

The Company maintains its accounting records in euros (EUR) and the annual accounts are prepared in this currency. Transactions made in another currency than EUR are translated into EUR at the exchange rate prevailing at the transaction date.

- cash and cash equivalents are valued at the exchange rate applicable at the balance sheet date, considering exchange rate differences as realized;
- all other assets expressed in another currency than EUR are valued individually at the lower of the value determined using the historical exchange rate or the value determined using the exchange rate prevailing at the balance sheet date;
- all liabilities expressed in another currency than EUR are valued individually at the higher of the value determined using the historical exchange rate or the value determined using the exchange rate prevailing at the balance sheet date;
- income and expenses expressed in currencies other than EUR are converted at the exchange rate applicable at the date of the transactions.

Consequently only realized foreign exchange gains and losses and unrealized foreign exchange losses are taken into account in the profit and loss account.

#### Prepayments

This asset item includes expenditures incurred during the financial period but relating to a subsequent financial period.

#### Provisions

Provisions are intended to cover losses or debts, the nature of which is clearly defined and which, at the date of the balance sheet, are either likely to be incurred or certain to be incurred but uncertain as to their amount or the date on which they will arise.

Provisions may also be created to cover charges that have originated in the financial year under review or in a previous financial year, the nature of which is clearly defined, and at the date of the balance sheet, are either likely to be incurred or certain to be incurred but uncertain as to their amount or the date on which they will arise.

#### Current tax provision

Provisions for taxation corresponding to the tax liability estimated by the Company for the financial years are recorded under the caption "Other creditors".
