PRESS KIT

who we are

Community Labs is a non-profit organization that works to create COVID-19 Safety Zones and a pathway for schools to reopen, people to return to work and communities to recover.

We utilize the strategy of assurance testing – testing for asymptomatic COVID-19+ individuals within micro-populations like schools and workplaces. Once identified, these “silent spreaders” can immediately quarantine allowing others to safely return to school or work.

our partners

- 80|20 Foundation
- The Tobin Foundation
- Kronosky Charitable Foundation
- BioBridge Global
- UT Health San Antonio
- Pathology Reference Laboratory
- Texas Biomedical Research Institute

50%

of COVID-19 outbreaks are attributed to silent disease transmission during the presymptomatic and asymptomatic stages. (PNAS).
