## REGULATORY TOUCHPOINT MAP MEDICAL DEVICES AND IN-VITRO DIAGNOSTICS – US FDA

PERSPECTIVE OF PERSON/ROLE	KNOWLEDGE REQUIRED TO OPERATE EFFECTIVELY	RELEVANT REGULATORY FRAMEWORKS	NOTES
<b>SEED</b>			
Engineer/inventor	Is product idea/technology regulated?	<ul style="list-style-type: none"> <li>Part of Freedom to Operate analysis</li> </ul>	<ul style="list-style-type: none"> <li>Specific to each country</li> <li>Understand trade-off between achieving regulatory compliance and altering product's intended use later in the product development lifecycle, e.g. often lower value and lower barrier to competitors for non-regulated products</li> <li>Understand that work may have to be repeated in the future for submission purposes if compliance is not established</li> </ul>
	Which regulations/standards potentially apply?	<ul style="list-style-type: none"> <li>Relevant guidance documents</li> <li>Relevant standards</li> <li>Pre-IDE</li> <li>IDE</li> <li>510k/PMA</li> <li>QSR</li> <li>Good Clinical Practices</li> <li>Good Laboratory Practices</li> <li>See FDA definitions of</li> <li>Medical Device</li> <li>In-vitro Diagnostic</li> <li>Combination products</li> </ul>	<ul style="list-style-type: none"> <li>Establish regulatory strategy</li> <li>Demonstrate reproducibility of the technology at a commercial scale</li> <li>Differentiate clearly between drugs and devices – not always intuitive, e.g. Is your technology a combination product?</li> <li>Early engagement with regulators to establish submission route, data requirements and clinical track (if applicable) with regulatory and technical experts on your team</li> <li>Develop design verification plan (in-vitro bench testing)</li> <li>Is the technology reproducible in multiple controlled environments?</li> <li>Perform testing to ensure output meets pre-determined specifications</li> </ul>

## REGULATORY TOUCHPOINT MAP MEDICAL DEVICES AND IN-VITRO DIAGNOSTICS - US FDA

PERSPECTIVE OF PERSON/ROLE	KNOWLEDGE REQUIRED TO OPERATE EFFECTIVELY	RELEVANT REGULATORY FRAMEWORKS	NOTES
<b>SEED</b>			
	Timing of regulatory requirements	<ul style="list-style-type: none"> <li>• Early requirement to:               <ul style="list-style-type: none"> <li>› Establish device design</li> <li>› Establish protocol driven studies (in-vitro and in-vivo testing)</li> <li>› Generate, collect and review data from protocol driven studies</li> <li>› Ensure study design, conduct and record keeping align with regulations</li> </ul> </li> </ul>	<ul style="list-style-type: none"> <li>• Product development should address engineering feasibility, align research with regulatory requirements:               <ul style="list-style-type: none"> <li>› Device description</li> <li>› Intended use</li> <li>› Target market</li> <li>› Competitor environment (technology and performance characteristics, similarities and differences)</li> </ul> </li> </ul>
	Likely costs and skills needed to pass regulatory science hurdle	<ul style="list-style-type: none"> <li>• Seek external expert advice for budgeting, process and resources</li> </ul>	<ul style="list-style-type: none"> <li>• Timing of costs important to establish capital runway to support R&amp;D</li> </ul>
	Likely costs and skills for regulatory support	<ul style="list-style-type: none"> <li>• Seek external expert advice for budgeting, process and resources</li> </ul>	<ul style="list-style-type: none"> <li>• Timing of costs important to establish capital runway to support R&amp;D</li> </ul>
Medsafe website listed consultants, Tech Transfer Office (e.g. VicLink, LSNZ, CMDT, WREDA)	Where to seek expert (light touch) advice	<ul style="list-style-type: none"> <li>• Expertise in device and IVD development e.g. some regulatory knowledge may lie within some university departments and research institutes</li> <li>• Medsafe list of professionals</li> </ul>	<ul style="list-style-type: none"> <li>• Form the right team for where the product is in its lifecycle</li> <li>• Limited knowledge of end-to-end regulatory pathways in university, so identify gaps and source expertise, i.e. establish/revise regulatory strategy</li> </ul>
	Do multiple regulations apply?	<ul style="list-style-type: none"> <li>• Do regulations concerning combination products apply?</li> </ul>	<ul style="list-style-type: none"> <li>• Convergent technologies may have primary and secondary regulations, e.g. drug eluting stents.</li> </ul>

## REGULATORY TOUCHPOINT MAP MEDICAL DEVICES AND IN-VITRO DIAGNOSTICS - US FDA

PERSPECTIVE OF PERSON/ROLE	KNOWLEDGE REQUIRED TO OPERATE EFFECTIVELY	RELEVANT REGULATORY FRAMEWORKS	NOTES
<b>START-UP, EARLY STAGE</b>			
Founder (technical)	Clear regulatory strategy	<ul style="list-style-type: none"> <li>• Early engagement with regulators</li> <li>• Relevant guidance documents</li> <li>• Relevant standards</li> <li>• Pre-IDE</li> <li>• IDE</li> <li>• 510k / PMA</li> <li>• QSR</li> <li>• Labelling</li> <li>• Protection of Human Subjects</li> <li>• Institutional Review Boards</li> <li>• Good Laboratory Practices</li> <li>• Good Clinical Practices</li> </ul>	<ul style="list-style-type: none"> <li>• Establish regulatory strategy, revise as needed to meet changes in the business</li> <li>• Regulations apply throughout the lifecycle of the product</li> <li>• Research studies</li> <li>• Safety and toxicology of the device</li> <li>• Product development</li> <li>• Labelling</li> <li>• Quality Control testing</li> <li>• Manufacturing and Process Controls</li> <li>• Clinical trial requirements, if applicable</li> <li>• Proof of safety and efficacy of the final product</li> </ul>
	Where to seek expert regulatory advice?	<ul style="list-style-type: none"> <li>• Medsafe website listed consultants</li> <li>• Local and international experts</li> <li>• Partners</li> <li>• OEMs</li> <li>• CMOs</li> </ul>	<ul style="list-style-type: none"> <li>• Confirm regulatory strategy prior to research budgeting</li> </ul>
	What research studies (preclinical) are required?	<ul style="list-style-type: none"> <li>• Relevant guidance documents</li> <li>• Relevant standards</li> <li>• Apply regulatory compliance or principles from the beginning</li> </ul>	<ul style="list-style-type: none"> <li>• Match regulatory requirements with potential multinational commercial requirements</li> <li>• Confirm market strategy</li> <li>• In the absence of regulatory requirements, business risk should be mitigated</li> </ul>
	What laboratory practices, facilities and standards are required?	<ul style="list-style-type: none"> <li>• Basic Quality System, Good Laboratory Practice (GLP), Good Documentation Practices (GDP) to maintain traceability and record keeping</li> </ul>	

## REGULATORY TOUCHPOINT MAP MEDICAL DEVICES AND IN-VITRO DIAGNOSTICS - US FDA

PERSPECTIVE OF PERSON/ROLE	KNOWLEDGE REQUIRED TO OPERATE EFFECTIVELY	RELEVANT REGULATORY FRAMEWORKS	NOTES
<b>START-UP, EARLY STAGE</b>			
Tech Transfer Office (e.g. Callaghan, VicLink, LSNZ, CMDT, WREDA)	Optimal reg pathway for speed of approval and IP settings	<ul style="list-style-type: none"> <li>Identify options</li> </ul>	<ul style="list-style-type: none"> <li>Establish regulatory strategy</li> <li>Be aware of regulatory pathways, e.g. Breakthrough Devices Program</li> <li>Expedited Access Pathways (EAP)</li> <li>Check and balance: Commercialisation strategy with IP strategy with regulatory strategy</li> </ul>
	Where to seek expert regulatory advice?	<ul style="list-style-type: none"> <li>Medsafe website listed consultants</li> <li>Local and international experts</li> <li>Partners</li> <li>OEMs</li> <li>CMOs</li> </ul>	<ul style="list-style-type: none"> <li>Confirm regulatory strategy prior to research budgeting</li> </ul>
	Is the product development team capable of designing and delivering critical regulatory engineering/science requirements in a commercial setting?	<ul style="list-style-type: none"> <li>Fill gaps in-house or as external consultants</li> </ul>	<ul style="list-style-type: none"> <li>Do issues of performance, scale and reproducibility exist for the technology?</li> </ul>
	How does regulatory strategy and timeline impact commercialisation strategy?	<ul style="list-style-type: none"> <li>Align regulatory planning with market launch planning</li> </ul>	<ul style="list-style-type: none"> <li>Is the company infrastructure experienced and/or adequate to support meeting regulatory and technical objectives?</li> </ul>
	How does Regulatory strategy and timeline impact IP strategy?	<ul style="list-style-type: none"> <li>Optimise patented time on market and data exclusivity (PMA only)</li> </ul>	
Investor (or TTO)	<p>Ensure runway and budget will achieve critical regulatory and quality milestones</p> <p>Ensure research \$\$\$ well spent and align for exit or licensing with the right partner</p>	<ul style="list-style-type: none"> <li>Visibility of clear, achievable plan</li> <li>Early discussion with multinational partner to confirm regulatory strategy</li> </ul>	
Part-time quality role	Experience and relevant working knowledge of product development and QSRs in a R&D setting to support pre-market approval	<ul style="list-style-type: none"> <li>Relevant guidance documents</li> <li>Relevant standards</li> <li>QSR</li> <li>Protection of Human Subjects</li> <li>Institutional Review Boards</li> <li>Good Laboratory Practices</li> <li>Good Clinical Practices</li> </ul>	<ul style="list-style-type: none"> <li>QSR knowledge and experience in the product technology and environment</li> </ul>

## REGULATORY TOUCHPOINT MAP MEDICAL DEVICES AND IN-VITRO DIAGNOSTICS - US FDA

PERSPECTIVE OF PERSON/ROLE	KNOWLEDGE REQUIRED TO OPERATE EFFECTIVELY	RELEVANT REGULATORY FRAMEWORKS	NOTES
<b>START-UP, LATE-STAGE - PRE-APPROVAL</b>			
Founder (technical)	<p>Clear regulatory strategy ahead</p> <p>Clear milestones identified to clear regulatory hurdles</p>	<ul style="list-style-type: none"> <li>• Same as above for early-stage</li> <li>• Confidence that planned studies will achieve regulatory clearance/ approval if scientific/engineering success, or achieve results that a multinational can utilise in a regulatory application</li> <li>• Stage-gate model</li> </ul>	<ul style="list-style-type: none"> <li>• Review/revise regulatory strategy</li> <li>• Establish if issues of performance, scale and reproducibility exist for the technology</li> </ul>
Medsafe website listed consultants, Tech Transfer Office (and/or CEO)	<p>Sufficient budget allocation to support product development activities</p> <p>Adequate regulatory skills and experience, e.g. timeframes, identifying critical data required to support market access</p> <p>Working knowledge of regulatory process</p> <p>Working knowledge of relevant regulations, guidance documents and standards</p>	<ul style="list-style-type: none"> <li>• Discuss with potential licensee or industry expert</li> </ul>	<ul style="list-style-type: none"> <li>• Licensees have rigid expectations about body of evidence that needs to be generated to demonstrate product potential</li> </ul>
CEO	<p>Regulatory impacts of R&amp;D, manufacturing and quality</p> <p>Facility licensing</p> <p>Regulatory impacts of scale-up</p>	<ul style="list-style-type: none"> <li>• Identify changes necessary for manufacture of units for clinical trial purposes, if needed</li> <li>• ISO13485 accreditation</li> <li>• Identify changes required for manufacture at scale</li> </ul>	
Investor/commercial partner	Regulatory capability	<ul style="list-style-type: none"> <li>• Is regulatory advice/support budgeted for pre-clinical, clinical, pre-market?</li> <li>• Is regulatory pathway clearly understood and resourced for successful execution?</li> </ul>	<ul style="list-style-type: none"> <li>• Budget required depends on risk classification of the device</li> </ul>
	<p>Regulatory risk (milestones achievable):</p> <p>Science/engineering</p> <p>Standards</p> <p>Timeframes</p>	<ul style="list-style-type: none"> <li>• Inputs to valuation according to risk weighted NPV</li> </ul>	

## REGULATORY TOUCHPOINT MAP MEDICAL DEVICES AND IN-VITRO DIAGNOSTICS - US FDA

PERSPECTIVE OF PERSON/ROLE	KNOWLEDGE REQUIRED TO OPERATE EFFECTIVELY	RELEVANT REGULATORY FRAMEWORKS	NOTES
<b>START-UP, LATE-STAGE - PRE-APPROVAL</b>			
Quality manager	<p>Experience and relevant working knowledge of product development and QSRs in a R&amp;D setting to support pre- and post-market approval</p> <hr/> <p>Facility compliance</p>	<ul style="list-style-type: none"> <li>• Relevant guidance documents</li> <li>• Relevant standards</li> <li>• QSR</li> <li>• Protection of Human Subjects</li> <li>• Institutional Review Boards</li> <li>• Good Laboratory Practices</li> <li>• Good Clinical Practices</li> </ul>	<ul style="list-style-type: none"> <li>• QSR knowledge and experience in the product technology</li> <li>• Management representative</li> <li>• Product release</li> </ul>
Regulatory manager	<p>Experience and relevant working knowledge of regulatory process, product development, QSR and commercialisation to support pre- and post-market approval</p> <hr/> <p>Ongoing monitoring for regulatory updates</p> <hr/> <p>Experience and relevant working knowledge of regulatory process, product development, QSR and commercialisation to support pre- and post-market approval.</p>	<ul style="list-style-type: none"> <li>• Relevant guidance documents</li> <li>• Relevant standards</li> <li>• IDE</li> <li>• 510k/PMA</li> <li>• QSR</li> <li>• Labelling</li> <li>• Protection of Human Subjects</li> <li>• Institutional Review Boards</li> <li>• Establishment and Listing</li> <li>• Good Laboratory Practices</li> <li>• Good Clinical Practices</li> <li>• Post-market approval requirements</li> <li>• Corrections &amp; Removals</li> <li>• MDRs</li> </ul>	<ul style="list-style-type: none"> <li>• Regulatory knowledge and experience in the product technology</li> <li>• Knowledge and experience of regulatory process for the region of interest</li> <li>• Ability to deliver a regulatory strategy that is current for the product and regulatory environment which is relevant to the business</li> <li>• Knowledge and experience in regulatory inspection/assessment</li> <li>• Ability to integrate regulatory knowledge into business strategy</li> <li>• Knowledge and experience in reimbursement process</li> </ul>
Clinical manager	<p>Relevant working knowledge of clinical research and operations with respect to the conduct of regulatory process and environment in product development to support pre- and post-market approval</p> <hr/> <p>Clinical expertise in the technology space/clinical application space</p>	<ul style="list-style-type: none"> <li>• Relevant guidance documents</li> <li>• Relevant standards</li> <li>• Protection of Human Subjects</li> <li>• Institutional Review Boards</li> <li>• IDE</li> <li>• 510k/PMA</li> <li>• Design Controls</li> <li>• Lifecycle Management</li> <li>• Good Clinical Practices</li> </ul>	<ul style="list-style-type: none"> <li>• See Clinical Trial touchpoint map</li> <li>• Human factors</li> <li>• Design Controls</li> </ul>

## REGULATORY TOUCHPOINT MAP MEDICAL DEVICES AND IN-VITRO DIAGNOSTICS - US FDA

PERSPECTIVE OF PERSON/ROLE	KNOWLEDGE REQUIRED TO OPERATE EFFECTIVELY	RELEVANT REGULATORY FRAMEWORKS	NOTES
<b>START-UP, LATE-STAGE - PRE-APPROVAL</b>			
R&D manager	Relevant working knowledge of regulatory process and environment in product development and commercialisation to support pre- and post-market approval. <hr/> Regulatory expertise in the technology space/clinical application space	<ul style="list-style-type: none"><li>• Relevant guidance documents</li><li>• Relevant standards</li><li>• IDE</li><li>• 510k / PMA</li><li>• QSR</li><li>• Design Controls</li><li>• Good Laboratory Practices</li></ul>	<ul style="list-style-type: none"><li>• Strong engineering skills for the product technology under development</li><li>• Skills in tech transfer, R&amp;D, test method development, process development, manufacturing and materials science</li><li>• Knowledge and experience in Design Controls</li><li>• Human factors</li></ul>
Manufacturing manager	Relevant working knowledge of regulatory process and environment in product development, tech transfer and commercialisation to support pre- and post-market approval <hr/> Manufacturing expertise in the technology space	<ul style="list-style-type: none"><li>• Relevant guidance documents</li><li>• Relevant standards</li><li>• IDE</li><li>• 510k/PMA</li><li>• QSR</li><li>• Process Controls</li><li>• Good Laboratory Practices</li></ul>	<ul style="list-style-type: none"><li>• Knowledge and experience in manufacturing standards for the environment the technology will be developed and manufactured</li><li>• Skills in R&amp;D, test method development, process development, tech transfer and manufacturing</li><li>• Knowledge and experience in Process Controls, Validation etc</li></ul>
Marketing/Sales manager	Relevant working knowledge of regulatory process and environment in product development and commercialisation to support pre- and post-market approval <hr/> Marketing and sales expertise in the technology/clinical application space	<ul style="list-style-type: none"><li>• Labelling</li><li>• Design Controls</li><li>• Complaint Handling</li><li>• MDRs</li><li>• Good Clinical Practices</li></ul>	<ul style="list-style-type: none"><li>• Knowledge and expertise in establishing label claims</li><li>• Knowledge and expertise in requirements needed to commercialise medical devices</li><li>• Knowledge in market, specifically of competitors for the sector</li></ul>

## REGULATORY TOUCHPOINT MAP MEDICAL DEVICES AND IN-VITRO DIAGNOSTICS - US FDA

PERSPECTIVE OF PERSON/ROLE	KNOWLEDGE REQUIRED TO OPERATE EFFECTIVELY	RELEVANT REGULATORY FRAMEWORKS	NOTES
<b>START-UP, LATE-STAGE, POST-APPROVAL</b>			
Founder (technical)	Clear milestones identified to meet market clearance/approval requirements including but not limited to clinical studies, as applicable	<ul style="list-style-type: none"> <li>• Same as above for late-stage pre-approval</li> </ul>	<ul style="list-style-type: none"> <li>• Post-market feedback loop into next-gen (new and improved) device</li> <li>• Confidence that planned studies will achieve post-market requirements, if applicable</li> <li>• Or achieve results that multinational can utilise in a different regional dossier</li> <li>• Ensure the existing device remains safe and effective once it's on the market</li> </ul>
Medsafe website listed consultants, Tech Transfer Office (and/or CEO)	Adequate budget and skills for regulatory support	<ul style="list-style-type: none"> <li>• Discuss with potential licensee or industry expert</li> </ul>	<ul style="list-style-type: none"> <li>• Licensees have rigid expectations about type of studies that demonstrate product potential</li> </ul>
Investor	Regulatory capability	<ul style="list-style-type: none"> <li>• Is regulatory advice/support budgeted for?</li> <li>• Pre-clinical</li> <li>• Clinical</li> <li>• Post-market</li> </ul>	<ul style="list-style-type: none"> <li>• Ensure the existing device remains safe and effective once it's on the market</li> <li>• Manage/mitigate product risk</li> <li>• Manage/mitigate patient risk</li> </ul>
	Regulatory risk (milestones achievable): <ul style="list-style-type: none"> <li>• Science</li> <li>• Standards</li> <li>• Timeframes</li> </ul>	<ul style="list-style-type: none"> <li>• Inputs to valuation according to risk weighted NPV</li> </ul>	
Quality manager	Experience and relevant working knowledge of product development and QSRs in a commercial setting to support pre- and post-market approval.	<ul style="list-style-type: none"> <li>• Relevant guidance documents</li> <li>• Relevant standards</li> <li>• QSR</li> <li>• Protection of Human Subjects</li> <li>• Institutional Review Boards</li> <li>• Good Laboratory Practices</li> <li>• Good Clinical Practices</li> <li>• Corrections &amp; Removals</li> </ul>	<ul style="list-style-type: none"> <li>• QSR knowledge and experience in the product technology</li> <li>• Management representative</li> <li>• Product release</li> </ul>
