Operators recommend
the FactoryPal app
to their colleagues

We bring operational shopfloor performance to life with IoT and AI technology centered around its users. Our solutions improve manufacturing performance by providing optimal production line parameter settings to your line operators.

**FactoryPal** is an independent corporate venture of **Körber Digital.**

What if your best operator worked every single shift?

Using AI in process manufacturing to boost machine efficiency by up to 30%

Get the most out of your machine data and staff expertise with FactoryPal

On numerous occasions, simply integrating machines, handling data, and managing data analysts does not yield the best results.

The Challenges

Increasing data loads, complex centerlines, and time consuming documentation

- Limited visibility on line parameter settings and their impact on output
- Suboptimal production performance due to different skills of operators
- Unclear how to reduce unplanned downtimes and microstops
- Insufficient time and tools for downtime documentation
- Losing employee knowledge due to workforce turnover

The Solution

Combining your operators' experience with AI

Digital solutions targeted for your people's tasks with desktop, tablet, and mobile applications.

» An automated, machine learning-based algorithm that sends the best centerline recommendations to your shopfloor team via our app

» Easy downtime documentation with an IF Design Award winning application improves your data quality significantly

» User-centric, actionable dashboards provide guidance how to improve shopfloor performance

» Knowledge and experience is automatically gathered, makes onboarding, and training of personnel significantly faster

The Benefits

Better centerlines leading to faster production and significantly increased stability

Our solutions provide the right information to the right persons at the right time.

01 Increase OEE by up to 30%

02 Reduce machine unplanned downtime by 50%

03 Reduce documentation time by up to 50%

04 Better and faster employee onboarding
