

# FinTech CTO

## FUNDED FINTECH STARTUP SEEKS VISIONARY CHIEF TECHNOLOGY OFFICER (CTO) 🙌

This start-up is:

- Transforming consumer finance
- Empowering customers on a pathway to significantly improved financial health
- Fintech VC funded & backed
- Generous equity package on offer
- Help shape the technology vision from day zero

## CREATE MASSIVE IMPACT 🚀 & BE PART OF HISTORY 📖

Our mission is large, every minute of the day, people around Australia worry about their finances.. People ask themselves *“Do I have enough money to get me through this week? I’m too much on my credit card, but I feel trapped, I want to save for a holiday, but my willpower sucks!”* You will now have the power to change that to: *“I feel confident with my money, I don’t worry about getting ripped off, I’m in control of my finances”.*

Help create money happiness and harmony for people so they can get back to doing what they do best, living their best lives and worrying less about money.

Come and join us and create amazing products millions of people will use to advance their lives.

## DO THE BEST WORK OF YOUR LIFE ✨

As a CTO, you will join as a core member of the initial team and help build the service from

effectively day zero. You'll join an experienced FinTech Found founder who has built and sold a FinTech business from scratch and backed by visionary VC fund. This time, we're swinging for beyond the fences. We are building a household brand and a revered brand. We are here to do the best work of our lives, and we hope you are too.

**ROLE** 🧑🏻‍💻 🏠 🖥️ 🧑🏻‍💻 🖥️

We're looking for someone who is still a software engineer at heart and is looking for their next rewarding challenge in their life. You'll be doing:

- Direct strategic technical vision for the company and anticipate, plan and act on shifts in technology
- Be responsible for the delivery of all software, including velocity and quality, and own the product roadmap
- Act as a Data Protection Officer and be responsible for the security and privacy of our customers
- Manage a team of awe-inspiring technologists to lead on our vision to be the best consumer finance company in Australia
- Develop new products and features, improve existing products and features
- Help estimate, plan and execute on projects, features, and integrations
- Champion code quality, new technologies, and architectural design within the company

**SOUND LIKE YOU?** 🙌🙌

**What are we looking for?**

**You will come from a background where delivering results and driving innovation is second nature and quality in equal measure and being able to transform and shape leading consumer applications**

- **Vision:** A clear vision of what a successful Product, Design and Engineering organisation looks like and how to achieve it.
- **Seen scale before:** You've been a part of, or help develop a product that has seen significant use and affected the lives of a lot of people/users (100k+)
- **Experience:** You are also a proficient engineer with a well-rounded software engineering background
  - You have 10+ years of professional technology experience
  - Significant mobile/web architecture experience with proven in market deployment

experience (and maintenance)

- A proven track record of leadership in areas of technology and product
- Direct responsibility of a team of engineers and other technologists

● **Automate:** A vision for applying software engineering skills and experiences to automate all aspects of the operational delivery and management process from build/test/deploy, monitoring and alerting, to automatic failover and capacity management.

● **Cool, Calm, Collected:** Ability to make rational, data-driven decisions under pressure while maintaining a calm and confidence-inspiring demeanour.

● **Security Focused:** We work in a regulated and environment, and security is paramount to us and also our users, examples where you have built highly secure consumer platforms will be highly advantageous

● **Customer-obsessed product focus:** You take pride in building an elegant and beautiful product. You never rest until what you create is truly blows away the customers.

● **Problem solver:** You excel at understanding and solving complex problems. You have astonishing attention to detail.

● **Quality communicator:** You can confidently break down tricky topics in writing and in person.

● **Surprisingly efficient:** You get a lot done quickly, and can translate your skills into new processes that your team will follow.

● **Leadership:** You will rapidly grow into a company leader. You will build company culture and help shape our future.

● **Location:** Perth Western Australia, Remote considered for the right candidate.
