

React Native Front End Engineer

FUNDED FINTECH STARTUP SEEKS VISIONARY UX/UI FRONT END ENGINEER 🙌

WeMoney is:

- Transforming consumer finance
- Empowering customers on a pathway to significantly improved financial health
- Fintech VC funded & backed
- Help shape the design vision from day zero

CREATE MASSIVE IMPACT 🚀 & BE PART OF HISTORY 📖

Our mission is large, every minute of the day, people around Australia worry about their finances.. People ask themselves *“Do I have enough money to get me through this week? I’m too much on my credit card, but I feel trapped, I want to save for a holiday, but my willpower sucks!”* You will now have the power to change that to: *“I feel confident with my money, I don’t worry about getting ripped off, I’m in control of my finances”*.

Help create money happiness and harmony for people so they can get back to doing what they do best, living their best lives and worrying less about money.

Come and join us and create amazing products millions of people will use to advance their lives.

DO THE BEST WORK OF YOUR LIFE ✨

We’re looking for someone who an awesome front end designer/engineer that will set the brand and vision for the company. You’ll join an experienced FinTech Found founder who has built and sold a FinTech business from scratch and backed by visionary VC fund. This time, we're swinging for beyond the fences. We are building a household brand and a revered brand. We are here to do

the best work of our lives, and we hope you are too.

ROLE

- Design the first breathtaking design of the companies mobile application experience
- Take on full ownership of a variety of high-impact initiatives & product experiences by contributing to our vision, strategy, process, and approach whilst supporting and advocating for user empathy and design process throughout.
- Establish design principals and patterns across the whole consumer lifecycle from onboarding to repeat usage
- Work creatively with all engineers on the team to deliver a delightful user experience

SOUND LIKE YOU? 🙌

What are we looking for?

You will come from a background where delivering results and driving innovation is second nature and quality in equal measure and being able to transform and shape leading consumer applications

- **Stack:** React Native (2 years+), Redux, Git, AWS, CI/CD
- **Experience:** 5-6+ years in Front End Engineering or User Experience Design, Product Design
- **User-Focused:** You possess an innate ability to translate findings into usable, useful, effective and efficient user experiences
- **Mobile Experience:** Deep understanding of mobile technology and the ability to design winning solutions in a B2C environment
- **Portfolio:** Portfolio of sample projects highlighting design for web-based applications, mobile applications & web sites and/or applications
- **The Down Low:** Interest in constantly keeping up-to-date of the latest trends, best practices and competitive activity
- **Think on your feet:** Ability to work well with ambiguity or when requirements are still in flux
- **Practical:** Proven experience showing a clear understanding of the intersection between user needs, technology requirements, and business goals
- **Design Leader:** Artistic eye for design and the ability to think creatively while maintaining accuracy and attention to detail
- **Excellent Performer:** Excellent organisational, time and project management skills
- An understanding of the latest design and technology trends and their role in a commercial environment
