CONSUMER CONNECT™ PROFILING

A sample of actionable profiling characteristics:

- Highest percentage of population interested in support related to nutrition or exercise.
- 18% of participants claim to enjoy seeking out information and opinions when it comes to their health.
- 57% struggle to find time to prioritize their health and wellness.

“ With Wellview Health, we have seen a significant reduction in claims trend for our member banks. Wellview’s reporting and data insights have changed the way we do business. We’ve benchmarked the program and couldn’t be happier with the results. Finally a strategy that our members use, that works.

— Dan Thomason,
President and CEO

CLIENT PROFILE

The Georgia Bankers Association Insurance Trust was established over 50 years ago to provide employee benefits to their members. They partnered with Wellview Health to engage their members and provide well-rounded clinical and behavioral support and health navigation.
