

Who We Are BibliU is a learning enablement platform that leverages digital content management, automation, and analytics to enable more efficient and effective learning.

The Problem All students need access to the texts they need to succeed, both in the classroom and remotely, yet print copies and digital options can be too costly.

Our Solution BibliU's Learning Enablement platform integrates with the LMS to give students immediate access to digital content in a format they love, at a library budget-friendly price, while providing usage insights and guaranteeing certainty of budget for your institution.

The Benefits

- Enable students with access to digital textbooks, ebooks, & other content
- Pay only for what students use
- Integrate fully with the LMS
- Save thousands in costs via purchase automation
- Gain analytic insights into student use of content

How It Works

We deliver the content — from over 2000 publishers and OER sources — via the BibliU platform.

You give us your book list and set up a deposit with us based on expected usage.

Students access the content, drawing down the deposit once they pass the preview allowance.
