

Features

- **Certified Materials**
- **High Quality Surface Finish**
- **Wide Alloy Selection**

Cosasco corrosion coupons are manufactured from certified materials in a wide range of metals and alloys. The surfaces of the coupons are free from scratches, tool marks, pits and other imperfections that would create measurement errors. The coupons are stamped with a unique serial number with a low stress stamp. Each coupon is packaged in an envelope treated with VCI (Vapor Corrosion Inhibitor) which prevents corrosive attack during shipment and storage.

Cosasco LPR electrodes are manufactured from certified materials in a wide range of metals and alloys. A high

quality 8-16 RMS surface finish and machined profile ensures uniform current density over the entire electrode surface. Electrodes are packaged in pairs with VCI (Vapor Corrosion Inhibitor) to prevent corrosive attack prior to use. New viton O-ring seals are provided with each electrode.

Electrodes can also be manufactured from special or customer supplied materials.
