

EQUITY LSLR PROGRAM

The City of Chicago is offering a new program to provide **FREE** lead service line replacements to low-income homes where the water has lead concentrations above 15 parts per billion.

You may qualify if you:

- Own your home – and it's a single family home or two-flat
- Have a household income below 80% of the area median income (\$72,800 for a family of four)
- Have persistent lead concentrations above 15 parts per billion in your water

The number of homes receiving free service line replacements will be capped annually by available funding.

GET STARTED NOW

Get your water tested for lead for free by calling 311 or signing up at www.chicagowaterquality.org. For more program details and a program application visit www.LeadSafeChicago.org.

What's Involved in a Lead Service Line Replacement?

The service line brings the water from the water main to your house. In Chicago, many service lines to single family and two-flat homes are lead. Replacing the line involves digging a trench from the street to your house. The new copper water service will enter your house through the floor or the wall and connect to your existing plumbing at the first water shut-off valve.

The lead service line ownership is split between the City (public side) and the homeowner (private side). If you qualify for this program the City will replace the full lead service line, including the homeowner's portion, free of charge.
