

Introducing the Motorola Whole Home Mesh WiFi System with MotoManage™ App, Your Work-from-Home and Homeschooling Solution

As living and dining rooms are looking more like offices and classrooms these days, internet networks are being put to the test. The Motorola Whole Home WiFi System is designed to eliminate laggy Zoom meetings, buffering screens, and streaming delays for optimal connectivity. Working together as one secure and expandable Whole Home WiFi (or Mesh) system, a router and individual WiFi satellites can be placed strategically throughout your home to deliver fast, stable connections.

Boston, MA, August 20, 2020 – Zoom Telephonics, Inc. (“Zoom”) (OTCQB: ZMTP), a leading manufacturer of cable modems and other communications products, is launching a Motorola Whole Home Mesh WiFi System featuring three product variants: MH7022 (one router and one satellite), MH7023 (one router and two satellites), and the option of additional coverage with the MH7021 (one satellite). Flexible and expandable features make this AC2200 Tri-band Whole Home Mesh WiFi System the ultimate WiFi solution for customers seeking more protection and control over their home networks. Upholding the performance and quality that you have come to expect from Motorola, these new products are designed to deliver ultra-fast Internet speeds and an uninterrupted connection.

“Internet security is more important than ever now that a majority of people are working from home,” said Phil Stanhope, CTO at Zoom Telephonics. “That’s why we have decided to include the basic MotoManage™ app with the purchase of one of our Whole Home Mesh WiFi products, giving everyone access to basic threat protection and security.” The app is available on both the App store and Google Play, and gives users easy configuration and network management with the purchase of their Motorola modem, router, or Whole Home WiFi system. Users can also upgrade to the premium app for \$5 per month, or \$50 for the whole year, to unlock more advanced security features and parental control benefits like content filters, schedule tracker, time limits, and more.

“We are focused on giving control back to the consumer; it’s time to own your own networking equipment, get the WiFi connection you’re paying for, and know who is on your network,” added Marlana Trombley, Interim CMO at Zoom Telephonics. “You can do this with the combination of a Whole Home Mesh WiFi System, one of our award-winning cable modems, and access to our MotoManage app for a money-saving bundling option.”

Dave Carroll, Executive Director of Strategic Brand Partnerships for Motorola, agrees that this product will provide customers with even more ways to use their home networks in a fast and secure way. “Motorola strives to deliver meaningful innovation to everyone and we want to transform the way our consumers discover, share, and connect with the world,” he explained “Now, with MotoManage, there is an extra layer of security and a number of innovative services to help people work and play from home.”
