

CHAIR FRAMES

All frame units are formed with 1" diameter, 18 gauge steel. Frames come in four sizes 12", 14", 16" and 18". All units are welded together with two seat brackets of 16 gauge die-formed steel, integrally tying all tube parts together for maximum structural integrity. Chairs can be stacked within like sizes. Frame is chrome plated after all welding is complete.

GLIDE SYSTEM

Glide attachment is a standard internal gripping spring steel umbrella 5/8" in diameter. The glide has a ferrule glide casing constructed of durable case hardened steel; no plastic. The glide is a full swivel design, silent and firm fitting for positive attachment and retention. All glides make full level contact with the floor. The glide base is made from nylon material to protect and easily slide over virtually all flooring surfaces.

STANDARD CHROME FINISH

Chrome is comprised of metal layers (Nickel & Chromium) electrostatically bonded to metal.

SHELL

One-piece shell is injection molded from special high impact, blush resistant polypropylene plastic. Textured surface is etched to provide a non-slip surface while assisting in maintaining like-new appearance. The underside of the shell is molded with an advanced rib pattern transferring weight directly to the frame. The shell is attached to frame with four machine rivets.

SHELL COLORS

Available in standard Black, Navy and Burgundy. Special order; Graphite, Forest Green, Red, Orange, Purple and Yellow.

DESCRIPTION	PART NO.	OVERALL PRODUCT DIMENSIONS	PRODUCT WEIGHT
Badger 12" high chair	BADG-12-XXX	22.24"h x 15.55"w x 28.50"l	5.63 lbs.
