

# Core Intelligence

Our foundational intelligence product covers four major categories of risk: Cybersecurity, Physical Safety, Geopolitical, and Legal/Compliance

- View risk through a unique, integrated lens
- Broad situational awareness across multiple risk categories
- Insights and monitoring that enable proactive risk management

**Core Intelligence provides** access to the insights and analysis you need to enable broad situational awareness, make more informed decisions, and drive better risk management outcomes

## Advanced analytical tools that enable more proactive risk management

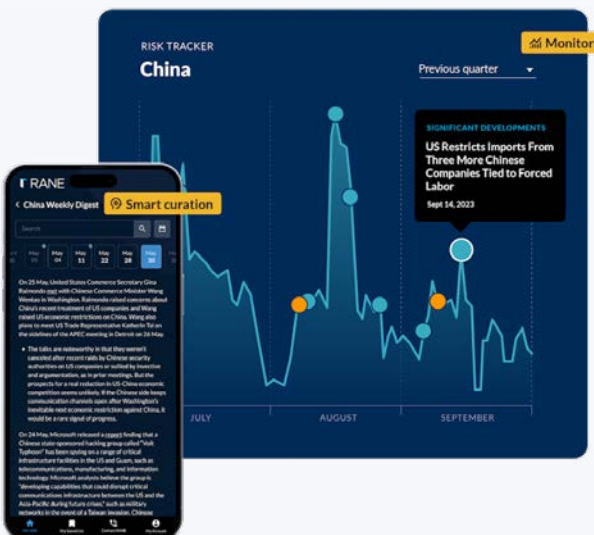

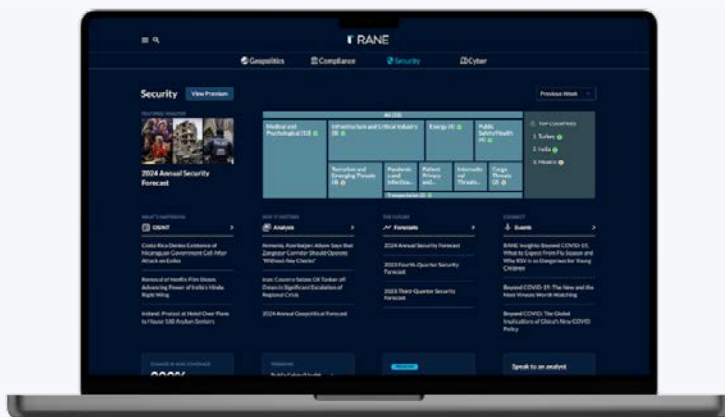

- Analytical tools efficiently assess relationships between topics and geographies and highlight the intersecting risks that organizations need to address.
- A relationship map leverages RANE's proprietary taxonomy for visualizing connected risks, and risk category pages provide a filtered view of covered topics and incident types.

## Access to RANE's complete analysis archive through a Unified Search Tool

- Single-portal access to RANE's full analysis archive so you can harness the spectrum of our trusted intelligence across all four risk categories.
- Users can access RANE's curated OSINT, proprietary analysis, forecasts, and events through one search box, then drill down by geography and topic.

## Ongoing risk monitoring tools to stay ahead of key issues as they evolve

- Smart curation of verified news and OSINT, compiled into daily and weekly Intelligence Briefs for better situational awareness and more informed preparation.
- Intelligence Briefs combine machine learning and human intelligence to turn information into actionable intelligence so you can keep current with risk developments.

## Client Insights

“RANE was able to help cut through the noise and hone in on the issues we really care about. With RANE extracting and identifying the most important items on an ongoing basis, I feel more informed and better prepared.”

**Senior Compliance Officer,  
Financial Services Company**

### On-the-go access to risk monitoring through a Mobile App

- The mobile app simplifies monitoring of global risk developments and harnessing of open-source information.
- Users get remote access to daily and weekly briefs as well as client-specific configurations.

### Knowledge-sharing events with practical insights on emerging risk issues from top risk experts

- Online access to a library of over 400 archived events, including event replays and summaries.
- Podcasts, webinars, briefing sessions, peer opinion polls, in-person summits, and more.

### Go deeper into a category, with seamless integration of

- Geopolitical intelligence
- Threat Intelligence
- Cyber Intelligence
- Intelligence Briefs

#### GLOBAL COMPOSITE RISK INDEX

**Russia** 50

### Data analytics and visualization tools to assess emerging risks and make more informed decisions

- The Global Composite Risk Index provides comprehensive evaluations of the drivers of individual country risk, covering 195 countries across 16 risk factors to help you make more fully informed decisions when deploying assets, people, and capital.
- Use Risk Tracker to diagnose systemic risks, monitor trends and key events, and map your company's exposure over time.
