

P R O D U C T F E A T U R E S

A wonderful new bathing experience!

The Escape walk-in tub features our unique uni-body construction – one seamless composite fiberglass bowl with a luxurious gelcoat surface. The apron, tub deck and bowl are seamless, producing maximum structural integrity.

Due to this superior strength and resistance to movement the door opening is impervious to twisting and warping. All Best Bath walk-in tubs offer a limited lifetime warranty.

Pre-installed plumbing with quick connect lines for professional installation.

The elegant, user-friendly patented door latch is constructed of stainless steel and brass components, no plastic. If adjustment should ever be necessary, it is easily made with this designer lever.

Jetted models feature the quietest whirlpool pump available, the new Syllent Pump. This pump is designed with a heat recycling feature to maintain water temperature and eliminate the need for an expensive in-line heater and additional wiring. This pump has a 10-year factory warranty.

Stainless steel cable operated tub drain mechanism with a lever handle for easy operation.

New heated seat with keypad control.

Optional deck extension and wall surround available to complete the installation.

Optional ozone sanitation system available.
