# 3Dsellers Announces Version 4, a Foundation for the Future

*"3Dsellers Version 4 makes managing an eCommerce and eBay business more dynamic, swift, and straightforward."*

3Dsellers has released a new system optimized to create a happier and more productive environment for eCommerce sellers and their teams by accelerating how merchants streamline eCommerce tasks while also laying a new foundation for the future of 3Dsellers eCommerce tools.

## **Increased speed, increased eCommerce productivity:**

The new, optimized system is hosted on a faster server, dramatically enhancing the action speed compared to previous versions of 3Dsellers. Whether uploading images & CSVs, replying to buyers, or managing items and daily workflows, it would be easy to say that 3Dsellers version 4 is one of the fastest eCommerce and eBay selling tool platforms on the market.

## **Enjoy a Comfortable Layout and Redesigned Workspace**

Developed by the remarkable collaboration of professional eCommerce sellers and the industry's best UI designers, 3Dsellers Version 4 is a clean, centralized, organized work environment for your eCommerce empire. (and there's a dark mode!)

From the tools themselves to profile settings, everything is updated to keep focus on what's needed in the moment by providing a materialistically minimalist atmosphere.

## **Multichannel eCommerce eBay CRM and Multichannel Orders Manager and Beyond**

With humble beginnings as an eBay CRM and Amazon SupportDesk, 3Dsellers multichannel Helpdesk is now customer service software for Etsy, helpdesk software for Shopify, a reply desk for WooCommerce, a Facebook CRM, and more, all consolidated into one eCommerce customer service app.

Because the multichannel helpdesk software integrates with multichannel orders manager software, managing inquiries, cases, or general messages is efficient and satisfyingly time-savvy.

## **A New Code Foundation: Ready for Expansion**

As 3Dsellers has entered the world of multichannel selling (a promising future for every seller), they've taken a responsibly-progressive step to lay a new foundation of code so they can create more of the best eCommerce selling tools with the sellers they serve.

In other words, the previous versions were structures on an old foundation that should not support building the extensions 3Dsellers is developing. So, they're laying a new foundation to build the multichannel selling platform of tomorrow.

## **3Dsellers V4 Is a Game Changer**

We are thrilled about the new version and future of 3Dsellers. Praised in reviews and sought after by top-rated sellers, the tools for eCommerce sellers that 3Dsellers has provided for over a decade keep getting better.

## **About 3Dsellers eCommerce Software**

3Dsellers provides marketing, automation, and business management tools for eCommerce sellers via an online SaaS platform built for enterprise and individual merchants alike, accommodating the growth and level of every seller.

A grassroots established company with over a decade of serving sellers worldwide, online reviews prove 3Dsellers also listens and implements sellers' requests, not only providing tools for sellers to grow but growing directly with sellers as the market demands.
