

No lines. No waiting. No stress.

Imagine if your customers could walk in, enjoy your services, and walk out—no standing in line, no shared devices, and no front desk interactions. Zenoti Go offers touchless mobile check-ins and payments with Auto-Pay and Self-Pay—to get customers to and from their appointments efficiently. It runs seamlessly on your consumer and employee mobile apps, making it a stress-free solution for your business.

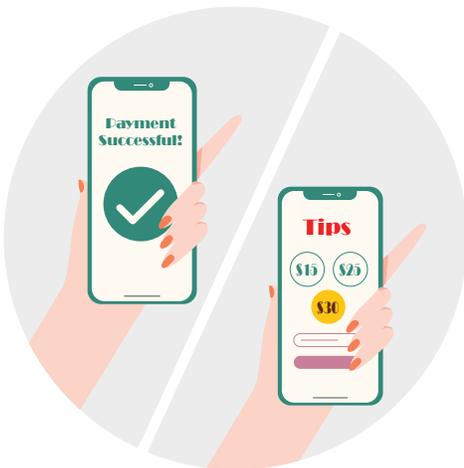

Single click self-check-in

No more waiting at the front desk to check-in. Zenoti Go uses geofencing to recognize a customer's arrival and sends them an auto-prompt to check-in on their mobile device. Once check-in is confirmed, customers can take a seat or wait in the parking lot, and the service provider receives a notification on their personal device.

Auto-Pay/Self-Pay—no-queue checkout and tipping

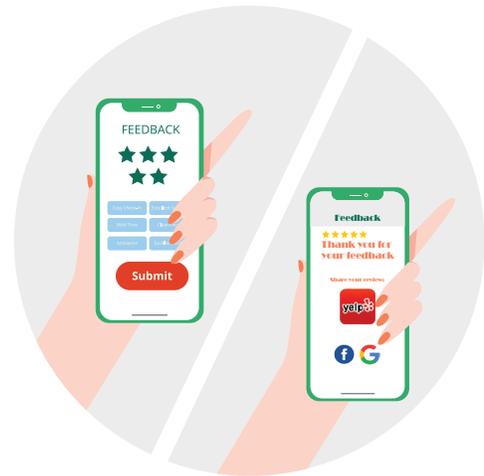

After the service, your customers breeze through the exit, skipping the checkout line. Your provider uses their mobile device to add any retail/add-ons to the invoice and initiates automatic payment. Customers receive Auto-Pay confirmation on their app and can add additional tips on the go. Customers can also add tips and directly pay on the app.

With alerts on payment failures, you know that every departing customer has paid.

Rate on the go

Happy customers come back and refer new customers. With an intuitive tag-based format, customers can quickly rate their experiences. You can share the feedback with providers, follow up on negative experiences, and win back unhappy customers. Build your brand's online reputation by redirecting customers to share online reviews.

Keep employees safer

Your providers and front desk benefit from the reduced use of shared devices and fewer customer interactions. Empower providers to update appointment statuses, upsell at the service chair and add retail/add-ons to invoices, and initiate payment at their fingertips — helping them focus on meaningful customer interactions.

Our clients think Zenoti Go is not just a good-to-have. It's a must-have.

"We live in a time when consumers expect ease and convenience through touchless technology on their mobile phones. Meeting those expectations has never been more important in our post-COVID world. It's not just about convenience, it's now also about health. That is why Gene Juarez is delivering touchless interaction for our customers. From the moment they book to the moment they pay and re-schedule, our customers can use their mobile phones for every interaction. It's one of the many ways we're elevating their experiences and safety."

Scott Missad, CEO, Gene Juarez
