2021 Class Schedule

December 16

Rev 3/23/2021

Course Description: Learning how to develop end-user graphics in the Alerton Compass software can empower anyone to customize their graphical user interface as they see fit. All it takes is a bit of time and effort!

Whether you want to learn how to create new Alerton Compass screen displays altogether or simply modify some existing graphics, CUST-1005 will equip you with the skills you need to accomplish these tasks.

Following this course, participants will be able to:

- Use the Alerton Compass display editor application to modify existing graphic displays or create new graphic displays altogether.
- Use the Syserco Standard Technical Library to automate the creation of Alerton Compass screens and graphics with ease, accuracy and consistency
- Understand design standards for Syserco customer sites which should be maintained when customizing pre-configured models and templates from the Syserco Standard Technical Library to suit individual project needs.
- Build a customized display navigation structure using the Nav Tree file feature in Excel for any Alerton Compass project.

Target Audience: Calling all DIY'ers! Any end-users of the Alerton Compass software who have a Do-it-Yourself attitude with creative minds and an eye for details will greatly benefit from this course.

Whether you are a dedicated facilities operator or a site technician who regularly works with the Alerton Compass software, this class empowers you to customize things to your liking in terms of end-user graphics and screens.

Prerequisite: All class participants must have completed Syserco's CUST-1004 Alerton DDC Programming for End-Users training class before taking CUST-1005.

The Syserco Practice-Based Learning Center
