

Cleanups

Making Green Cleanups the Norm

GREENNUDGE

Why Cleanups?

Every year, more than 8 million metric tonnes of waste ends up in our oceans¹, greatly affecting the marine biodiversity and the seafood produce we eat. In 2019 alone, the National Environment Agency (NEA) and Maritime Port Authority of Singapore (MPA) collected 4500 tonnes of marine debris², highlighting the need to prevent contributing more trash into our oceans.

Cleanups are often the first touchpoint for people to realise their impact on the environment. At Green Nudge, we believe that an effective cleanup is much more than just picking up trash along the shore. In line with our goal to 'nudge' (and not to 'instruct'), we aim to redefine the cleanup experience by also weaving in the historical and cultural aspects of the site. Through this approach, we draw the connection between nature and our behaviour to allow participants to develop an appreciation of their natural heritage and environment.

“We want to redefine the cleanup experience by going beyond the cleanup activity to share about the historical and cultural importance of the site. In doing so, we draw the connection between nature and human actions.”

The Basic Package

DIY fuss-free

Keen on organizing your own cleanup but are unsure how to deal with the equipment after the activity? Our cleanup toolkits are available for rent so that you can enjoy the convenience of a ready toolkit and avoid the hassle of buying and storing equipment!

Includes:

- Equipment Rental (starting from 4 toolkits for 20 pax) for 3 calendar days
- Self-collection or delivery options (charges apply)
- Cleaning of equipment after the cleanup
- (Optional) 30-min consultation session before the cleanup

Equipment provided:

20 pairs of tongs and gloves
40 x large green trash bags or rice sacks
4 x weighing scales
1 x first aid kit
1 x corporate coastal cleanup manual
Other supplementary equipment

To order our basic package, click [here](#).

The Enhanced Package

For a little more guidance

Our most popular cleanup package, the Enhanced Package provides start-to-end coordination of cleanups at different cleanup sites around Singapore. You will be guided by the Green Nudge team right from the start, including planning out suitable cleanup dates, timings and venues, including areas which may need prior approvals from the authorities. Participants gain access to hard-to-reach areas which require more effort in cleanups while giving back to the environment in a meaningful manner. Suitable for large groups or first-time cleanup organisers.

Includes:

- Liaison of approval and post-event waste disposal by Green Nudge
- Provision of cleaning equipment, collection and post-event cleaning
- Facilitation of cleanup by Green Nudge facilitators, including explanation of history and cultural aspects of cleanup site
- Debrief of cleanup activity and sharing of post event call-to-actions
- Post cleanup summary
- (Optional) in-depth data collection

Duration:

3 hours (excluding travelling time)

Cleanup Sites:

Yishun Dam, East Coast Park, Pasir Ris Park, Sembawang Park or Coney Island

Enhanced Package

Cleanup Layout

Duration:

3 hours (excluding travelling time)

Cleanup Sites:

Yishun Dam
East Coast Park
Sembawang Park
Coney Island

Number of Participants:

Minimum of 20 pax

Leaving a Lasting Impression

Post cleanup, receive a customised infographic highlighting the cleanup data from the event. Together with tips to care for the broader environment, share these information with participants to reinforce the call-to-actions after the event.

WHAT'S NEXT?

Care to go beyond our Greenup event? Here are some tips on what you can do to foster a greener environment for our beaches!

After the event:

- First off, go ahead and share your group's achievement on social media! The ocean is cleaner today than it was before thanks to you and your team! 🌞 Psst - Be sure to add what you learnt and encourage your family & friends not to litter our oceans! Tag us @greennudgesg or use the hashtag #greenup2021!

Next time you're at the beach:

- Clean up your trash after a gathering at the park or at a beach party. Don't leave your trash in the open as the wind can pick them up and land on our beaches.
- Take trash, not shells! Pick up 3 trash items instead of shells and throw them into the bin. Let's leave our beach decorated with shells, not trash!
- Use a portable ashtray so it's easier for you to dispose your cigarette butts.
- Toss your reusable bags into your backpack, handbag, and car so you don't have an excuse not to have one when you're shopping for groceries before your BBQ!
- "Nudge" your family & friends to bring less plastic bags to your beach picnics. This will limit their chances of being swept by the wind easily and finding their way into our oceans.
- Brought some takeaways to your beach picnic? Bring a reusable container next time or rinse and reuse your disposable container for tomorrow's leftovers in the office!
- Go even further and organise a fun, mini cleanup activity with family & friends! Log all your cleanup data at **RISE** (www.rise-network.sg) to help build a cleanup map of Singapore.

Why Green Nudge?

Towards a Low Carbon Zero Waste Singapore

At Green Nudge, one of our aims is to achieve a carbon neutral Singapore by 2030.

In Singapore, all of our waste is sent for incineration. Despite our best efforts to clean our shores, the trash that we collect inevitable generates more carbon emissions through our cleanups.

Providing Carbon Offsets for a Greener Cleanup!

Working with credible partners that provide carbon offset credits, Green Nudge will offset carbon emissions generated in order to minimise our carbon footprint.

After the event, Green Nudge will calculate the overall amount of carbon emissions generated, including but not limited to:

- Transport
- Cleanup activity
- Overall disposal of waste collected

Interested in Building a Sustained Impact?

Mix and match your experience

Go beyond and customise your cleanup to be part of our Sustained Engagements package! Choose from a combination of workshops, talks or learning journeys where participants can explore, act and reflect in-depth on one or two themes to enjoy the full green experience.

How Sustained Engagements Work

Choose from a combination of Cleanups, Workshops and Talks over a 6-month period.

- ✓ At least 3 engagements over 6 months
- ✓ Suitable for 20 - 50 participants

Learn more about Sustained Engagements [here](#)

FAQs

How does Green Nudge choose the suggested dates and timings for my organisation's cleanup?

In order to maximise your activity's impact during the vent, we will recommend a day and time when the tides are low enough so that there is more trash available for your participants to pick up. Speak with us to find out more.

Do you have alternative activity/wet weather plan? What happens if it rains?

As many of our sites are located in hard-to-access areas, we may not be able to provide an alternative activity in the event of wet weather. In the event that wet weather occurs or is expected to occur before the event, we will contact the liaison person an hour before the start of the vent to update on the weather forecast and advise on the next course of action.

In the event of heavy downpour during the vent, participants may seek shelter at the nearest building which will be guided by our facilitators. Should bad weather persist or worsen, Green Nudge reserves the right to cancel the event for safety reasons.

What is the lead time between the enquiry process to event execution?

The team will need at least 3 weeks of lead time once you have given us your approval. This lead time allows us to obtain approval from the relevant authorities, prepare relevant equipment and schedule our facilitators prior to the event. The lead time for our Basic Package is 3 working days.

Why do you charge for your services?

As a social enterprise and registered business, we believe that the best way for us to maximise impact is to ensure the financial viability of the work. Thus we charge reasonable fees to cover our costs and ensure the long-term sustainability of our enterprise.

What will your fee cover?

The fee will cover the following:

- Efforts for obtaining approval and ensuring that waste is properly disposed off after the session
- Provision of relevant cleanup equipment as well as post-event cleaning
- Provision of facilitators, including sharing of the historical and cultural site of the area
- A portion of the money also goes towards reducing carbon emissions through carbon credits
