Contact

We are proud to be able to support customers all-over the world. In order to give them best possible advice and service regarding all questions on the Holsteiner horse and the Holsteiner Verband, we are cooperating with partners in different countries since a couple of years already.

Our partners in Australia and New Zealand are Sophia Gostelow and Clare Friedlander.

They can assist you as a rider, owner or friend of Holsteiner horses with know-how, competence and passion. Buying horses, selecting a stallion or planning a visit – no problem.

We would appreciate if you profit from the wide knowledge of our representatives.

Please feel free to contact our contact persons in any cases.

Cancara

| | | | |
|----------------------------------------------|-------------------------------|-------------------------------------------------|-------------------------------------------------------------------------------------------|
| Cassini I DE321210021688 172 cm | Capitol I 169 cm | Capitano <hr/> Folia H | Corporal Retina H <hr/> Maximus Vase H |
| | Wisma H 173 cm | Caletto II <hr/> Prisma H | Cor de la Bryere SF Deka H <hr/> Mahmud Cerena H |
| Lacosta J DE321210155096 170 cm | Corofino I 166 cm | Corrado I <hr/> Valeska IV HSP | Cor de la Bryere SF Soleil H <hr/> Fernando Option H |
| | Georgia IV H 170 cm | Constant <hr/> Zarissa II H | Cor de la Bryere SF Ella <hr/> Calypso I Rominta H |

Considerations for breeding

Cancara offspring stand out for their exceptional jumping quality, as the big-framed Cassini I son standing 1.76m tall is able to pass on his own jumping ability and technique to his offspring. Cancara is excellently suited for mares with a lot of TB blood.

Cancara by Cassini I – Corofino I

*2004 | 176 cm | Grey | LN: DE421000100804 | Mare family 162

Cancara is a big-framed stallion, in his appearance clearly stamped by his sire Cassini I. At the Neumünster stallion grading he performed brilliantly in all jumping phases, and counted among the stallions demonstrating the greatest jumping ability.

Sire

Cancaras sire Cassini I was a stamp stallion of special quality. He left the Holsteiner breed a number of top sport horses such as the Olympic horses Isovlas Olympic (Steve Guerdat) and Cavalor Cumano (Jos Lansink), who also became World Champion in Aachen in 2006 and won the world's highest endowed show jumping competition in Calgary in 2004.

Damline

This stallion carries highly interesting bloodlines as his dam Lacosta comes from stem 162, one of the most successful mare families in the world. As yet, stem 162 has produced a number of Olympic horses – Cöster, Carthago Z, Canturo, Waterford Crystal, Feinschnitt, Foliant and Madrigal. Stem 162 has several branches. Cancara goes back to the branch of Meistergrad daughter Katrin, a foundation mare at Peter Reimer Janssen's Kattrepel stud farm. She is 3rd dam to Non Stop, a highly successful jumping sire in the Belgian studbook, and 2nd dam to Cöster, winner of individual and team gold with Christian Ahl-

man at the 2005 Europeans and team bronze medallist with the German team at the Athens Olympics in 2004.

Own performance

Cancara was 70-day performance tested at Schlieckau in 2009 where he scored 10.0 on jumping ability as well as jumping technique and 9.75 on stadium jumping in the final test. Even though Cancara was competed only a few times due to his frequent use at stud, he succeeded in placing in young horse jumping classes under Lars Bak Andersen.

Offspring

Numerous highly interesting sport horse offspring have been attracting attention in recent years, like Classic Edition, toppriced lot of the Holsteiner spring auction in 2014, and Consoto, a bright young jumping talent sold to the stable of US top rider Kent Farrington through the Holsteiner Elite Auction. Other successful international level young sport horses by Cancara include Bali with Janne Friederike Meyer-Zimmermann, Cascara RN with Ingemar Hammarström, Dacara E under Cassandra Orschel, Cyranthus with Markus Heim (SUI), Be Happy with Miriam Schneider, Paypapers Casilla under Jeff Paw Nielsen (DEN), Classic Edition with Tom Martens (NEL) and Concorde under Stijn van Gorp (BEL).

Casall under Rolf-Göran Bengtsson

| | | | |
|----------------------------------------------|-----------------------------|----------------------------------|------------------------------------------|
| Caretino DE321210242583 168 cm | Caletto II 170 cm | Cor de la Bryere SF | Rantzau/TB Quenotte SF |
| | Isidor 165 cm | Deka | Consul Oekonomie |
| Kira XVII DE321210249895 170 cm | Lavall I 166 cm | Metellus | Marinus Nachtbluete |
| | | Corbala | Aldato Unna |
| | Maltia 167 cm | Landgraf I | Ladykiller/TB Warthburg |
| | | Raimond | Sacramen. Song/TB Griet |
| | Duldige | Ramzes AA Infra | Korenbleem/TB Zulia |

Considerations for breeding

The results achieved by Casall offspring speak for themselves. But like any successful breeding stallion, he is running the risk to be used for commercial purposes rather than selective breeding. Generally, Casall should be bred to leggy mares influenced by TB genes, as he comes from a performance dam line frequently characterized by less frame but great depth of body. As this is generally considered a Raimond inheritance, line-breeding to this stallion is not advisable.

Casall by Caretino - Lavall I

*1999 | 168 cm | Bay | LN: DE321210208399 | Mare family 890

Casall is the Holsteiner studbook's poster boy and high-achiever, at stud and in sport. Because Casall had already stood out at the stallion grading pre-selection, the Holsteiner Verband purchased him from the owner syndicate Hennings and Mehrens.

Dameline

Casall's dam Kira traces back to stem 890, one of the most successful Holsteiner performance mare families. At the 2005 Neumünster stallion grading, her son Clarence by Carano attracted a lot of attention and won reserve champion. Casall's 2nd dam, Maltia by Raimond, produced Taura (by Lord), and Taura in her turn produced the licensed stallions Ringo Starr and Cesano I and II. The successful international sport horses, Crocodile Dandy (Alison Firestone) and Conally (Markus Renzel), are out of Taura, as well.

Own performance

Under Rolf-Göran Bengtsson, Casall used to be one of the highest-achieving horses on the international show jumping circuit, making the top 25 at all major championships, the 2012 London Olympics, the 2013 Herning Europeans, and the 2014 Caen World Equestrian Games. Herning saw him win team bronze with the Swedish team and placing 4th individually. At Caen, he took 4th place again following a more than convincing performance throughout the championship week. Since 2011, he won 10 legs of the Global Champions Tour. In 2014, he placed 2nd in the GCT's overall standing, tied with the winner, Scott Brash, and he finished on 3rd place overall in 2015. In 2016, at 17, Casall won the Valkenswaard, Paris, and Doha legs as well as the overall standing of the Global Champions Tour. At 18, Casall was retired from

competition fit as a fiddle. And this top athlete ended his career with a bang as his farewell involved winning a Global Champions Tour leg in front of a home crowd. The farewell ceremony directly after the win in front of a teary-eyed audience was again very emotional. Casall is a living legend!

Offspring

Casall is in a class of his own also as a breeding stallion. Various international top level competitions saw Casall compete against his own offspring – impressive evidence for his ability to pass on his quality. His highly successful international offspring include H&M Chilli Willi with Nicola Philippaerts (BEL), Austria with Kent Farrington, Caillou with Karl Cook, Casallvano with Marco Kutscher, Cita with Daniel Coyle, Chesall Zimequest with Simon Delestre (FRA), Casello under Ludger Beerbaum, Cristallo A LM with Philippe Rozier (FRA), Wunschkind with Eric van der Vleuten (NED), Casall under Ali Wolff (USA), and Caracas under Jos Verlooy (BEL), to name just a few.

His daughters Vontessa, Akimba, Cascada I, Graziella, and Indira VI won the Elmshorn elite mare show in 2008, 2011, 2013, 2017, and 2019, respectively. His sons Casaltino and Cadilo became champion stallions of the 2013 and 2018 Neumünster stallion grading, respectively. Two Casall sons won reserve champion stallion, Catch it in 2009 and Cascadello I, who sold at a record-breaking 600,000 euros, in 2011, and Cardin became second reserve champion in 2017. As yet, 72 sons have been stallion-graded in Germany and he has produced 76 state premium mares.

| | | Perra H | Calando I Kerrin H |
| | Winnipeg III HSP 170 cm | Caletto II | Cor de la Bryere SF Deka H |
| | | Marotte H | Sacramen. Song/TG Darau HSP |

Considerations for breeding

A young stud with a bloodline carrying exceptional sires based on a consolidated dam line. Considering his distinctive type and high-quality movement, he is expected to produce foals suited to meet the requirements of the modern market. Castle Creek's particular strengths are his rideability and his quality canter. Along with his aptitude for jumping, combining energetic take-off, carefulness and scope, he offers the breeders an excellent opportunity to improve their mares' inheritance.

Castle Creek by Casall – Carthago

*2014 | 169 cm | Bay | LN: DE421000045214 | Mare family 18A2

Castle Creek's breeding is the manifestation of such a powerful genetic make-up. His type and ability to perform have been particularly influenced by selective line breeding to top sire Caletto II.

Castle Creek boasts excellent and highly impressive basic gaits, not only in-hand, but also under saddle, with a canter in a class of its own. He is a very careful jumper with outstanding hind leg technique.

Sire

His sire Casall is known as exceptional performer of the highest calibre. With his own and his offspring's performance beyond any doubt, he has gained worldwide recognition.

Damline

His dam Orchidee is by Carthago, a two times Olympic horse and winner of many international high-profile grand prix competitions under Jos Lansink with a reputation as an international top sire despite only a short time at stud. Orchidee's produce also includes Formidable by For Pleasure – State four-year-old Holsteiner Jumping Champion at Elmshorn in 2009 and later top class young jumper in the USA. His second dam Winnipeg has produced several successful S level jumpers as well as Lasandos, a Holsteiner-graded stallion highly respected in the Irish stud book. The dam line is based on stem 18A2 which has produced numerous international sport horses like for example Calle Cool, winner of the Hamburg Derby, and King Artus, Olympic gold medallist in eventing.

Own performance

Castle Creek successfully completed 14-day ability assessment in Schlieckau. He was given 9.0 on temperament and 8.5 on willingness to perform, with his canter and free-jumping earning him 8.0, respectively. Castle Creek's first showing season in 2018 was very successful as he won the qualifier to the Elmshorn State 4-year-old jumper Championship with Ebba Johansson at a score of 8.8. In 2018, Castle Creek's first outings in competition very successful; with Ebba Johansson he won the qualifier for the Elmshorn four-year-old jumping horse State Championship at a mark of 8.8. The past season saw him placed in young horse jumping classes through M* and win four classes at L level.

Offspring

Castle Creek's first crop was very promising. A very attractive foal out of a Lordano-Calypto II dam bred by the breeding community Sievers, Niendorf, qualified for the Bad Segeberg VTV/R+V Holsteiner foal championship.

Catch with Maximilian Gräfe at the National Championships

| | | | |
|-------------------------------------------|-------------------------------|------------------|-------------------------------|
| Colman DE321210176396 169 cm | Carthago 171 cm | Capitol I | Capitano Folia H |
| | | Perra H | Calando I Kerrin H |
| | Rosenquarz H 162 cm | Lord | Ladykiller/TB Viola H |
| | | Faukasien H | Marlon/TB Leonore H |

| | | Baroness VII H | Coriander Kollet HSP |
| | Inschy H 166 cm | Caletto I | Cor de la Bryere SF Deka H |
| | | Dorle II H | Lacapo Taucha HSP |

Considerations for breeding

Catch should be able to improve in terms of frame and lines. Moreover, he is expected to pass on his very good rideability, his intelligence and his great carefulness over the jump.

Catch by Colman – Calido I

*2013 | 173 cm | Grey | LN: DE421000038513 | Mare family 890

Catch has the clear rectangular frame so important for a sire. His face and bright eyes reflect his intelligence and even temper. His neck is big and ties nicely into the body, with long and well-defined withers well connected to a very good back and croup structure. He has very correct legs and perfectly shaped hooves of suitable size. His very regular movement results from his hindquarters' excellent ability to carry weight, allowing for a particularly powerful canter.

Sire

His sire Colman is one of the best sons of exceptional jumping sire and top jumper Carthago – ridden by Jos Lansink, the multiple grand prix winner competed at the Olympics twice. Colman's own produce include the highly successful Catwalk (Roger Whitaker) and L.B. Convall, under Philipp Weishaupt not only the highestearning German show jumper in 2017, but also winner of the Aachen and Calgary grands prix.

Damline

Not only since Casall, Catch's dam line, stem 890, has been known as one of the Holsteiner studbook's most successful families. The dam line known as "von Horsten's stem" has a reputation for a particular willingness to perform. His dam Pia competed as a show jumper prior to being bred. Results including placings at S level emphasize the dam line's athleticism and hereditary reliability and definitely confirm the importance of a stallion dam's own performance in competition.

Own performance

Catch's final jumping weighted score in the Münster-Handorf sport test was a thrilling 9.73, a mark without precedence in a stallion performance test. He was given 9.6 on canter and manner, 9.8 on ability and rideability and 10.0 on overall impression. Test rider Pico Hannover and the judges Peter Schmerling and Hubert Uphus had nothing but praise: "Catch performs with enormous strength, a ground-covering canter and without any tension. The stallion always takes off with lots of energy and always jumps the oxer pole with a lot of scope. He jumps through the body, with great judgement and already very balanced. For a four-year-old, he gives a perfect overall impression". 5-year-old, Catch became a serial winner of young horse jumping classes at A and L level. Over the past season Catch highly successfully competed in jumping classes through M** with Maximilian Gräfe. Winning a total of seven classes, the combination qualified for the Warendorf National Championships. Since late 2019 Rolf-Göran Bengtsson has got the ride. Their first outings proved highly successful and very promising.

Offspring

Catch's first foal crops have made a positive impression. He has had very interesting offspring at the Holsteiner foal auction sales these past two years, like for example the top-priced lot of the foal auction held at the Holsteiner Horse Days, a typey Catch-Casall filly knocked down at 20,000 euros. The winning bid for another Catch-Casall foal sold at the Holsteiner foal auction during the Hamburg Derby was 17,500 euros.

Clarimo under Rolf-Göran Bengtsson

| | | |
|---------------------------------------------|-----------------------------|------------------------------------------------------|
| Clearway DE321210218393 169 cm | Capitol I 169 cm | Capitano Corporal Retina |
| | | Folia Maximus Vase |
| | Wodka II 166 cm | Lord Ladykiller/TB Viola |
| | | Gerona 2 Ramiro Corinna |
| Wisma DE321210059284 173 cm | Caletto II 169 cm | Cor de la Bryere SF Rantzau/TB Quenotte SF |
| | | Deka Consul Oekonomie |
| | Prisma 168 cm | Mahmud Marlon/TB Turteltaube |
| | | Cerena Cobalt Emiliane |

Considerations for breeding

Clarimo offspring stand out for blood, performance attitude, and predominantly elegant type. He should only be bred to mares known to pass on good natural ridability as well as correct front legs and sound hooves.

Clarimo by Clearway - Caletto II

*2003 | 172 cm | Grey | LN: DE421000278903 | Mare family 3389

The Holsteiner Verband stallion keeping GmbH boasts an intentional level top sire in Clarimo. At just 17 he is listed 28th on the international WBFSH sire ranking.

Sire

Clarimo's sire, Clearway by Capitol I, achieved international placings with Lars Bak Andersen, for example at the Neumünster and Bayschweig grands prix. The great genetic make-up of exceptional mare Wodka is also brought out by her daughters Chika's Way (by Caretino), a mare with many international results first under Janne Friederike Meyer, then Katrin Eckermann, and later Pius Schwizer, and Carassina (by Concerto II), winner of the Hamburg Derby under Thomas Kleis in 2009.

Damline

Clarimo's dam Wisma has made breeding history through her licensed sons, Cassini I and II. Cassini I in particular used to be one of the Holsteiner stud book's most in-demand sires. His jumping quality is not down to random luck as Clarimo's bloodline combines the outstanding performance genes of the stallions Capitol I and Caletto II with those of Wisma and Wodka. Both mares have produced several outstanding jumpers during their career at stud. The produce of Lord daughter Wodka includes the licensed stallions Clearway, Conway I and II and Arturo, as well as Carassina, winner of the German Jumping Derby under Thomas Kleis in 2009.

Own performance

In his first competition season with Janne Friederike Meyer, Clarimo stood out as a serial winner of young horse jumping classes at L and M level. He won the State 6-year-old Jumping Championship and qualified for the National Championships. At 7-year-old, he already placed to S level in the international Verden and Neumünster youngster tours. In 2012, he was highly placed in jum-

ping classes through S** level. Since late 2012, Rolf-Göran Bengtsson got the ride on him, resulting in numerous international top placings in jumping classes through 1.60m level for example in Doha, Paris, s'Hertogenbosch, Hamburg, Valkenswaard, Lyon, Vienna, Rome, Cannes, and Gothenburg. Winning the 2016 Falsterbo CSI5* grand prix has been Clarimo's greatest success as yet. He also had several excellent results with the Swedish team and was on the winning team of the 2017 Rotterdam Nations Cup leg. Unfortunately, Clarimo suffered a career-ending injury in the course of this competition.

Offspring

Clarimo offspring enjoy quite the reputation on the international show jumping scene. His son Chardonnay is a high-achiever boasting numerous placings at 5* level, including 3rd place in the Calgary grand prix in 2019. The many excellent results of Bardolina by Clarimo in her career with Mario Deslauriers include winning the Bridgehampton Grand prix. Other successful FEI level Clarimo offspring include GK Coco Chanel with Conor Swail (IRL), Canamera with Lauren Hough (USA) and Be Apperle VA under Jörg Naeve. In addition to all these highly interesting showjumping progeny, Clarimo has been attracting attention for his eventing offspring: Costbar won the National six-year-old eventing horse Championship in Warendorf in 2017. The judges were full of praise, predicting a future at advanced level competition.

As much as 12 Clarimo sons have been stallion-graded in Holstein, Crunch being the most successful, with international placings to 1.60m level under Rolf-Göran Bengtsson.

Clarksville

| | | | |
|-------------------------------------------------|----------------------------|---------------------------------|-------------------------------------------------------------|
| Cascadello I DE421000288209 170 cm | Casall 168 cm | Caretino Kira XVII | Caletto II Isidor H Lavall I Maltia H |
| | Viviana 171 cm | Clearway Irana H | Capitol I Wodka II I Love You A.N Zilia H |
| Zauberstern DE421000193107 163 cm | Canto 168 cm | Canturo Krokus | Cantus Fara H Limbus Flair I |
| | | Clinton I Gangstern H | Carolus I Waage I Latouro Causa II S |
| | Tanzstern 167 cm | | |

Considerations for breeding

This Casall grandson stands out for his energy and enthusiasm and the way he presents himself, along with his excellent basic gaits and his quality jumping. Same as his sire Cascadello I he is expected to produce high-quality foals. Due to his very good topline he should be well able to improve this trait in particular. His tremendous energy and movement should also enable him to bring about considerable improvement.

Clarksville

by Cascadello I – Canto

*2014 | 175 cm | Bay | LN: DE421000048314 | Mare family 318D2

Clarksville had been on the experts' radar already since the 2016 stallion grading pre-selection. The stallion attracted particular attention during the entire pre-selection and stallion grading procedure. Right from the start, he stood out for his typical Holsteiner performance. Characterized by clear and convincingly masculine expression, this big-framed Cascadello I son always moves with an uphill tendency thanks to his powerful hind leg action right from the very first step. Moreover, his exceptional locomotion is ground-covering, rhythmic, and supple.

Sire

Having already produced the 2015 champion stallion, Charleston, from his first crop, Cascadello I presented another top quality son – Clarksville – at the 2016 stallion licensing.

Damline

Clarksville's second dam, Tanzstern, has already produced one show jumping offspring with achievements to S level by Nekton.

The female line 318D2 counts among the Holsteiner stud book's most successful mare families, with various very successful branches across the breeding area. The family branch of Clarksville is very closely related to Dutch Championship contender GLOCK'S

Cognac Champblanc, Nicola Philippaert's success horse H&M Chilli Willi, as well as to Camiro, successfully shown at the Hong Kong Olympics under Norway's Tony Andre Hansen.

Own performance

Clarksville's 14-day Schlieckau ability assessment yielded very good results. His canter was graded 10.0 and his free jumping 9.5. Because of his excellent movement, the Cascadello I son was presented in ridden classes by Kornelia Kindermann in 2017. And quite successful, as Clarksville became 3- and 4-year-old riding horse champion at Bad Segeberg. Four-year-old and more developed, Clarksville's excellent performance in ridden classes earned him many wins and front placings.

Now Kimberly Hinrichs got the ride of Clarksville. They won already a dressage horse class A and L level at their first start.

Offspring

Clarksville's first crop has been very convincing and included the winner of the Bad Segeberg VTV/R+V Holsteiner foal championship, a very typey colt with tremendous movement bred by Birgit Joergensen of Roedekro/DK out of a Lorentin I – Linaro dam. of his foals awarded premium status.

Cornetino under Ebba Johansson

| | | | |
|----------------------------------------------------------|---------------------------------|------------------------------------------|-----------------------------------------------|
| Cornet Obolensky BWP BEL002W00184083 172 cm | Clinton 172 cm | Corrado I | Cor de la Bryere SF Soleil H |
| | Rabanna Coester-veld BWP | Urte I H | Masetto Ohra H |
| Valentina IX DE421000329105 164 cm | C-Indoctro 166 cm | Heartbreaker KWPN | Nimmerdor AUS Bacarole KWPN |
| | | Holivea Costerveld BWP | Randel Z HAN Gudula BWP |
| | Thyra 167 cm | Capitol I | Capitano Folia H |
| | | Vanessa VII H | Caletto II Orgesch H |
| | Landgraf I | Ladykiller/TB Warthburg | |
| | Odetta | Ronald Ibylle | |

Considerations for breeding

With Cornetino's performance bloodline, his exceptional jumping and excellent rideability his greatest assets, he should be bred accordingly. Moreover, mares intended for breeding to Cornetino should display good movement at trot and have a good, compact topline.

Cornetino by Cornet Obolensky BWP – C-Indoctro

*2009 | 166 cm | Dark bay | LN: DE421000231309 | Mare family 104A

This big-framed stallion is particularly striking as he embodies elegant performance type, very masculine with bright eyes and a well-structured back. He has the jumping quality to be expected from his bloodline, and excels particularly in terms of ability and scope. Cornetino himself was successfully shown in jumper classes through S level and anticipation is running high for his first showjumping offspring. Brandenburg main and state stud Neustadt upon Dosse is standing Cornetino on lease this season.

Sire

His breeding shows a great deal of deliberation, with Cornet Obolensky being one of the currently most successful representatives of the Corrado sire line. The maternal 2nd sire C-Indoctro is one of the most influential Capitol sons and has had a great impact on Dutch breeding. The following sire, Landgraf, used to be the stallion with the highest-earning offspring by far for years.

Dameline

Cornetino's 5th dam is Retina. She won the Derby under Fritz Thiedemann and became one of the most important foundations mares in the Holsteiner stud book. For generations, stem 104A has been among the Holsteiner mare families most successful in producing high-achieving breeding stock and sport horses. The stallions Capitano, Carneval, Caretano and Contendro as well as the international sport horses Corradina, Athletico and Corland are only some representatives of this successful line.

Own performance

After licensing and 30-day testing, the stallion was put to stud at 3-year-old for one season only and was then produced for competition. Already at 5-year-old he had several high placings in jumping classes at M* level. Matured since, he shone with many very good placings and wins to M level under Maximilian Gräfe in 2015. In 2016, the combination was placed at international level at the Kiel and Neumünster horse shows. Cornetino impressively demonstrated his outstanding quality as a jumper by placing 3rd in the first qualification and 11th in the final of the National 7-year-old Jumping Horse Championship in Warendorf. Under Ebba Johansson, Cornetino secured numerous results in jumping classes through S* level during the past season.

Offspring

From a first-year crop comprising only 6 foals, Contessa H, a 3-year-old Cornetino daughter won champion jumping mare in Switzerland in 2016; moreover, she also won the title "Miss Switzerland". 50 percent of Cornetino's next crop have been awarded premium status in Germany first and foremost because of his foals' excellent type. A particularly typey colt out of a Calido I-Corofino I dam (Uwe Bojens, Epenwörden) was selected for the Elmshorn elite foal auction.

Crack with Ebba Johansson

| | | | |
|----------------------------------------------------------|----------------------------|----------------------------|-------------------------------|
| Cornet Obolensky BWP BEL002W00184083 172 cm | Clinton 172 cm | Corrado I | Cor de la Bryere SF Soleil |
| | Rabanna van Costerveld BWP | Urte I | Masetto Ohra |
| | | Heartbreaker KWPN | Nimmerdor Bacarole KWPN |
| | | Holivea van Costerveld BWP | Randel Z HAN Gundula BWP |
| Operette DE321210312499 168 cm | Candillo 164 cm | Cassini I | Capitol I Wisma |
| | | Desy | Grundyman/TB Texas |
| | Adele 169 cm | Aloube Z HAN | Alme A.N Gotendirndl HAN |
| | | Una Corda | Calypso I Flotte |

Considerations for breeding

With the Cornet Obolensky blood as well as Crack's damline standing for very careful, high-quality jumping, this young stallion should be able to pass on his jumping quality. In view of his good type and modern structure he should be well able to improve mares lacking in this department.

Crack by Cornet Obolensky BWP - Candillo

*2015 | 170 cm | Grey | LN: DE421000412115 | Mare family 1020

The big-framed grey stallion Crack stands out for his type and appearance. He embodies modern Holsteiner breed type; his excellent topline, with a light and well-proportioned neck blending into an ideal shoulder, and perfectly conformed withers and back deserves special mention. Crack owes his elegant Arabian touch to Amurath, a stallion he carries several times through Cornet Obolensky, Capitol and Gotthard. Crack consistently demonstrated his jumping quality throughout the pre-selection and inspection – very scopey and with a very good bascule, he comes across as ambitious, with a can-do-attitude and a particularly striking hind leg technique.

Sire

With several World Cup, Nations Cup and championship placings under his belt and having crowned his career under Marco Kutscher with team gold at the Madrid Europeans in 2011, Cornet Obolensky is considered one of the most successful international top level show jumpers of his time.

Damline

Crack's dam line has distinguished itself at international level in competition. His sister Corcega la Silla by Casall attracted a lot of attention in youngster classes at international

horse shows with Rolf-Göran Bengtsson and is now very successfully shown at S level by Jose Antonio Chedraui, particularly in Mexico and North America. A brother to Crack, Inar C by Quidam de Revel, competed in jumping classes at international level to 1.50 m already at nine-year-old. His second dam Adele has also produced the successful sport and breeding stallion Ouinar by Quidam de Revel.

Own performance

Crack passed 14-day ability assessment at Neustadt upon Dosse with flying colours. He was given 9.0 on jumping aptitude (free jumping), whereas the test rider awarded 8.0 on rideability, earning him a total mark of 8.60 (jumping weighted). Crack's first showing season has seen him demonstrate his exceptional jumping quality, as he returned from almost all outings in young horse classes victorious with marks as high as 8.6.

Offspring

Crack's first foal crop left a positive impression. A typey colt out of a Consens dam (Carl Carlsen, Leck) qualified for the VTV/ R+V Holsteiner foal championship in Bad Segeberg.

| | | Soleil | Capitol I Kuerette |
| | Kimberly III 165 cm | Contender | Calypso II Gofine |
| | | Option | Lord Golda |

Considerations for breeding

On the strength of past experience, Diarado is likely to bring about most improvement when bred to tall, leggy mares with big movement.

Diarado by Diamant de Semilly SF - Corrado I

*2005 | 169 cm | Seal bay | LN: DE421000339405 | Mare family 318D2

Hardly ever, the Holsteiner stallion licensing in Neumünster has seen an equally clear-cut and celebrated champion as in 2007. Diarado's description by breed director Dr.Nissen reads as follows: "The champion stallion oozes incredible charisma and epitomizes modern sport horse type. His magnificent type goes along with a good topline, a strong back and four perfectly correct legs. His basic paces improved from fairly good walk to good trot, crowned by a perfect canter. But his presentation reached fever pitch in the free jumping phase where he demonstrated perfect judgement from the very first approach, jumping with a flexible body, excellent leg technique and unbelievable scope, all of which earned him a 10.0."

Sire

Diarado carries world champion blood through his sire, Diamant de Semilly, a member of the gold winning French team under Eric Lavallois at the Jerez World Equestrian Games in 2002. Bred for performance, Diamant de Semilly – just like his sire Le Tôt de Semilly, an own son of legendary Grand Veneur – is one of the most successful stallions in France.

Damline

Diarado's dam is by Holsteiner jumping horse sire Corrado I and a full sister to licensed stallion Crawford. Through the famous stallions Lord and Ramiro, the dam line goes back to the highly successful stem 318D2 bred by the Bernhard family. This mare family has produced the studs Corofino I + II, Coriano, Chello I + II as well as champion stallion Camiros.

Own performance

Diarado's performance is obvious – he won the Schlieckau stallion performance test at 150 index points overall; 4-year-old he won young horse jumping classes scoring 9.0; 5-year-old he won the qualifier to the National Championship final with the marks 9.0 and 9.3, and placed third in the final scoring 9.0 and 9-year-old he took 3rd place in the S*** level grand prix at the Dobrock horse show, to name only a few achievements.

Offspring

Diarado foals realize top prices, with Diarado offspring the highest-priced lots of the Elmhorn foal auctions in 2011 and 2013. In 2014, Dito by Diarado was the Neumünster auction's most expensive riding horse and also in 2015, a Diarado offspring - Dublin - was among the top-priced horses at the Neumünster Holstenhall, and Diarado changed hands through the 2018 Neumünster elite riding horse auction at 90.000 euros. As yet, eight Diarado sons have been stallion-graded in Holstein – 40 all over Germany. The first Diarado offspring have become a fixture on the international show jumping scene. One of the currently most successful Diarado offspring is Don Diarado: with Maurice Tebbel, he represented the German colours at the Tryon WEG and was on the bronze winning German team. Holstein-bred Dicas by Diarado-Cassini I-Lancetto is successfully shown by US American rider Margie Goldstein-Engle, with several placings through international 1.60m level. Just recently, Diarado's ability to produce exceptional sport horses has been stated in the international WBFSH sire ranking, where he is listed on 20th position at a still young age of 14.

| | | Venise de Cresles SF | Elf III SF Miss Cresles SF |
| | Roxette I 165 cm | Corrado I | Cor de la Bryere Soleil |
| | | Kimberly III | Contender Option |
| Inken I DE321210135794 168 cm | Cassini I 172 cm | Capitol I | Capitano Folia |
| | | Wisma | Caletto II Prisma |
| | Dolli II 161 cm | Caretino | Caletto II Isidor |
| | | Maibirke | Marlon/TB Herietta |

Considerations for breeding

From the breeder's point of view, Dinken's outstanding performance attitude and ambition are of particular importance, as well as his exceptional jumping aptitude with top-class ability, carefulness, and jumping technique. The medium-framed stallion stands 1.67m at the withers, with a well-proportioned, compact top-line and is best bred to leggy, big-framed mares.

Dinken by Diarado - Cassini I

*2010 | 167 cm | Bay | LN: DE421000707310 | Mare family 2294

The 2012 premium stallion was described as “probably best Diarado son” by breeding director Dr. Nissen: “He embodied perfect type and great athleticism when presented at Neumünster. Already his expression as a very modern young stallion was in a class of its own. The stallion has ideal frame and a perfectly constructed top line with a strong back and very good proportions. His legs are very correct and in good proportion to his body. His basic gaits are excellent throughout and emphasize the energy of this athlete. His demonstrates his quality in particular over the jumps. This Diarado son can be rated an exceptional talent, as well.”

Sire

His sire Diarado, Holsteiner champion stallion in 2007, attracts attention for his own performance and particularly for his offspring. His progeny, including his highly successful sons Don Diarado, Ducas, and Dito has earned him a reputation as a top sire, as documented by 20th position on the international WBFSH sire ranking at just 14 years of age.

Damline

Dinken's dam Inken has been successfully shown at international level by Peter Wylde. At 3-year-old she won champion mare of North Frisia breeding district. She has stamped her son in terms of type, structure, and boundless performance attitude. Her produce includes four show jumping offspring with results to international S level, Quinken (Max De Mol), Quinka (Hikari Yoshizawa), Incaro LS (Tom Martens) and Dinka (Hikari Yoshizawa). Moreover, her daughter Ninken (by Littorio) has produced the stallion-graded international jumper, Clicksem.

Own performance

Dinken performed impressively during 30-day testing. With his jumping ability judged 9.0, his jumping breeding value was estimated at 134 points. During the 2015 season, Dinken achieved many very good results under Jonas Panje. He won several young horse jumping classes at L level and was highly placed in young horse jumping classes at M* level. The combination also qualified for the National Championships in Warendorf. In 2016, Dinken competed in young horse jumping classes to M level with great success. He qualified for the Warendorf National Championships again and won the Elms-horn 6-year-old Holsteiner Jumping Horse State Championship. A severe tendon injury ended Dinken's sport horse career.

Offspring

Dinken's foal crops have been really impressive, with excellent type, loads of energy and wonderful movement. A three-year-old first-crop Dinken daughter out of a Casall-Calando I dam was sold to Italy at 42,000 euros through the Neumünster elite riding horse auction.

Dinken has already seven approved stallions in Germany, for example Dubliner by Dinken-Canturo.

By now, the first Dinken offspring have been shown in competition. His licensed son Denver was noted over the past season with Hannes Ahlmann by winning young horse jumping classes through M level. Another Dinken offspring, Dollar-KL (Filip Dolezal/CZE) attracted attention at the Lanaken World five-year-old Jumping Championship.

| | | Contenance OLD | Donnerhall OLD Contenance II |
| | Kirudja OLD | Quattro B SF | Qredo de Paulstra Une Americane SF |
| | | Kiruna OLD | Feiner Stern HAN Kimba OLD |

Considerations for breeding

Goldball provides an interesting option for breeders with dressage ambitions. Due to his modern conformation he can be used to improve in terms of size, long lines, and long legs. His exceptional abilities as to rideability and basic gait make room for new breeding decisions.

Goldball OLD by Goldberg KWPN - Sir Donnerhall I OLD

*2015 | 172 cm | Dark bay | LN: DE433332209815

In terms of type, movement, and bloodline, the stallion already approved for the Mecklenburg and Oldenburg studbooks has many qualities required for a dressage horse sire in the Holsteiner breeding programme.

Particularly impressive about the dark bay stallion standing 170cm at the withers are his big, calm eye, his excellent long lines and his correct legs. He displays big movement with good rhythm, in hand as well as under the rider, always very elastic and with an up-hill tendency.

Sire

Goldball's ancestry is of particular interest for the Holsteiner studbook. His sire Goldberg is by Amazing Star, an own son of Flemmingh (by Lacapo), a Holsteiner stallion with an excellent reputation in Dutch dressage horse breeding. Goldberg's offspring includes stallion graded sons as well as a Westfalian champion mare, Gloria. Ridden and produced by Hubertus Schmidt, Goldberg has not only chalked up wins in ridden and young dressage horse classes, but also won dressage classes at S level.

Damline

Goldball's dam carries Holsteiner blood elements through Sir Donnerhall. Moreover, through Quattro B, Feiner Stern and Tiro, the dam line traces back to a sister to international eventer Volturmo (Otto Ammermann), carrying the TB sires Vollkorn and Manolete in direct succession.

Own performance

The stallion completed 14-ability assessment at Neustadt upon Dosse with very positive results, as he received the subscore 9.0 on temperament, character, willingness to perform, trot, canter, and rideability from the test rider, finishing the test on a total dressage

weighted mark of 8.88. In 2018 the stallion was shown in a ridden class where he finished on first position. 2020 Kimberly Hinrichs got the ride of Goldball and showed him impressively at the Holsteiner Verband stallion presentations.

Offspring

Goldball's first crop proved convincing all along the line. His foal evaluation-based breeding value is 128, with a 141 sub value for gaits and impulsion. His foals' powerful movement also attracted attention at the Holsteiner foal auction sales. A Goldball-Aljetto colt was knocked down at 14,000 euros at the elite foal auction and a Goldball-Catoo filly qualified for the VTV/R+V Holsteiner foal championship.

| | Cento | Illico d'Arsouille BWP | Fleuri du Man SF Venzin d'Arsouille |
| Wallon de Muze BWP | | Capitol I Viola XI H | Nabab de Reve Qerly Chin BWP |

Considerations for breeding

Million Dollar provides an interesting outcross option – only Cento by Capitol and Chin Chin in the 5th generation carry Holsteiner blood. Given the high concentration of top jumping genes, the stallion is expected to breed with great reliability. Mares known as reliable producers of Holsteiner type and Holsteiner way of going should be bred to this outcross stallion, preferably.

Million Dollar BWP

by Plot Blue KWPN –
Vigo d'Arsoilles BWP

*2004 | 176 cm | Grey | LN: DE421000100804 | Mare family 162

The stallion displaying the colourful markings of his sire Plot Blue and a still youthful appearance was anything but heavy. His movement was highly interesting, with an outstandingly regular, very ground-covering walk, a trot with good knee action, and a very efficient canter, powerful and with excellent carriage from behind. The free jumping proved more than convincing, very much to the purpose and very controlled, but on the same hand extremely careful, with a good bascule, an excellent, bouncy pushoff and the ability to be expected from his bloodline.

Sire

His sire Plot Blue team gold medallist at the 2010 WEG in Lexington, Kentucky; winner World Cup final in 2010 (tied with Küchengirl); winner Top Ten final in 2009. His 2nd sire Vigo d'Arsoilles individual gold medallist at the 2010 WEG in Lexington, Kentucky.

His 3rd sire Cento team gold medallist at the Sydney Olympics, winner World Cup final in Leipzig, winner Aachen Grand Prix.

Damline

His dam, Gin Tonic de Muze, has only been used for breeding. His 2nd dam, Daytona de Muze, was successfully shown in jumping classes at 1.60m level under Belgian rider Jody Bosteels and has been sold to the USA since. His 3rd dam, Wallon de Muze, was successfully

competed by Michel Hécart (1.60m), same as her full sister, Walnut de Muze, under Harrie Smolders. His 4th dam, Quirly Chin by Chin Chin was successfully shown at international level by Eric Lamaze.

Own performance

Five- and six-year-old, Million Dollar has been a serial winner in young horse jumping classes at L and M level under Ebba Johansson. He tops the results list almost every time he is shown and chalked up as much as six wins at M in 2018 alone. Over the past season, Million Dollar caused was highly successfully shown in youngster classes to S level, causing quite a splash with his performances. Million Dollar has been at the yard of Jos Lansink since November 2019 and shown at international level by Frank Schuttert.

Offspring

Million Dollar's first foal crops are very promising with many typey offspring put up for sale at the Holsteiner foal auctions. A filly out of a Corrado I dam was sold to Switzerland at 15,000 euros and a colt out of a dam by Lancer II was sold to Italy at 13,500 euros. In 2018, the highest-priced lot of the Holsteiner foal auction held at the Hamurg Derby was a Million Dollar- Quite Capitol foal with the winning bid at 26,500 euros.

| | | Option H | Lord Golda |
| | | Carthago | Capitol I Perra H |
| | | Wonne VI | Ladalco Orinoko |

Considerations for breeding

The stallion's performance attitude, natural rideability and quality jumping are his most outstanding assets. Mares bred to Quiran should have a well-set neck and up-hill movement. In view of the stallion's uncomplicated temperament, he should be well suited for difficult or very spirited mares. His best offspring as yet, medium sized, typey, and with good movement, is out of a Clearway-Contender dam.

Quiran by Quirado - Coriano

*2009 | 172 cm | Bay | LN: DE421000293509 | Mare family 2049

A Holsteiner stallion through and through, he epitomises breed type. This eye-catching Quirado son is modern with long legs, correct structure and a big frame. His good topline reflects his well-balanced structure in its perfect connection of all body parts. His legs are

correct. The quality of his movement increases from quite good walk to big trot to excellent, jumped, uphill canter.

Quiran is the result of a successful breeding principle: a proven, well-bred sport stallion bred to a consolidated sport horse dam line.

Sire

His sire Quirado – prior to his injury a successful sport horse – is by Quidam de Revel out of a dam from the successful mare family of Contender.

Dameline

Quiran's dam Pandora is by Coriano; the stallion placed 2nd at the 6-year-old National Championships under Bo Kristoffersen, went on to compete successfully at international level and later demonstrated performance attitude, ability and overall quality of the highest order under Judy-Ann Melchior, then a junior level rider. The performance dam line traces back to Quiran's 5th dam, the sport mare Ilona by TB sire Wüstensohn; among other achievements, she became German Champion under Hermann Schridde and also won the President Cup in the USA.

Own performance

HQuiran's convincing performance earned him outstanding marks in the 30-day ability assessment as well as his Schlieckau 70-day performance test. With a training score of 9.0, his impressive jumping ability was graded 9.75 by the test rider in the final test. He also scored 9.0 on performance attitude and temperament.

At four-, five-, and six-year-old he was very successfully shown in young horse jumping classes and qualified for the Warendorf National Championship at five and six. As the stallion had to undergo colic surgery in 2016, he could neither be shown nor bred for a substantial period. Fully recovered, he was carefully put to work again. Trained and produced by Ebba Johansson and her coach Lorenz Lassen, Quiran is shown in jumping classes through international S** level and wowed the crowd with his excellent rounds in the Neumünster grand prix where he finished sixth.

2019 Quiran was sold to the USA and is very successful in Hunter classes.

Offspring

Quiran produces quality foals, modern, and typey. A typey Quiran-Canto colt selected for the Elmshorn Holsteiner elite foal auction has found his way to a well-respected stallion producer in the Netherlands. With the first Quiran offspring born in 2013, showjumping sons and daughters can be found on young horse class result lists all over Germany.

United Way with Ebba Johansson

| | | | |
|------------------------------------------------|-----------------------------------|--------------------------------------|---------------------------------------------------------|
| Uriko KWPN NLD003200707442 168 cm | Untouchable KWPN 165 cm | Hors la Loi 2 SF | Papillon Rouge SF Ariane du Plessis II |
| | | Promesse KWPN | Heartbreaker KWPN Chablis |
| Marassina DE321210257797 167 cm | Wizzard KWPN | Lavito | Lavaletto Gala II |
| | | L. Coradin | Corrado I Prinzessin |
| | Concerto II 168 cm | Contender | Calypso II Gofine |
| | | Bagina | Ahorn Z Gitta |
| Wodka II 166 cm | Lord | Ladykiller/TB Viola | |
| | Gerona 2 | Ramiro Corinna | |

Considerations for breeding

United Way has a highly distinguished bloodline in terms of jumping quality and willingness of perform. The reliability for passing on high-quality jumping genes is supported by his sire Uriko, his dam Marassina, and his second dam Wodka's performance offspring. Greatly influenced by TB genes and steeped in athleticism, United Way should be able to produce performance. His very good topline should also enable him to provide his offspring with appropriately long and strong backs.

United Way by Uriko KWPN - Concerto II

*2015 | 170 cm | Bay | LN: DE421000408615 | Mare family 1916

The young stallion displays modern type. His big, bright eye is a reflection of his wonderful disposition. His face shows a clear masculine expression. His neck's conformation is very good, as is his perfectly conformed back. The Uriko son has excellent movement. Displaying three equally powerful, ground-covering, and supple basic gaits, his canter is particularly remarkable. Consistent with his bloodline, he jumps with outstanding technique, scope, and ability. United Way's breeding combines a unique constellation of successful mares and stallions which have distinguished themselves at stud and in sport.

Sire

His sire Uriko is successfully shown in 1.50m classes and is gaining more and more of a reputation for his quality offspring. A number of licensed sons, including champion and reserve champion at the Neumünster stallion grading, as well as showjumping offspring highly successful in young horse classes, like for example Charisma HS, 2019 National five-year-old jumping horse Champion in Warendorf, testify to Uriko's class and importance for the breed.

Damline

United Way's second dam, Wodka has produced the licensed stallions Arturo and Clearway, as well as Conway I and II. She has eight showjumping offspring with S level results, including United Way's dam, Carassina by Concerto II. Having already achieved results to 1.50m classes under the saddle of Nisse Lüneburg, Carassina was sold to Udo Chistee (Schlosshotel Wendorf) in 2008, with the ride given to Thomas Kleis. The successful

combination not only collected numerous international results but also won the Hamburg German Jumping Derby in 2009.

United Way's bloodline deserves special attention for his dam sire, Concerto II. This Contender son which died from colic at just 5-yearold produced a rare count of successful showjumping offspring. With only a few daughters put to stud, these are considered exceptional gems.

Own performance

United Way completed sport testing with excellent results. He received 9.3 on ability, 9.0 on overall impression and 8.8 on rideability. The stallion had his first outings in competition with Ebba Johansson last season which saw them place second in the qualifier to the State four-year-old jumping horse Championship at a score of 8.2, among other achievements.

United Way caused quite a splash during the presentation of the auction foal sires at the Hamburg Derby ground. Ridden by Sandra Auffarth, he impressed international riders and expert crowd alike as he cantered and jumped totally unfazed by the Derby ground's special atmosphere.

Offspring

The first United Way foals were born last year. At the Holsteiner foal auction sale held during the Hamburg Derby auctioneer Hendrik Schulze-Rückamp knocked down a United Way-Cayado filly at 11,000 euros. Another expressive filly by United Way out of a Con Air dam was sold at the elite foal auction sale in August, realizing 10,000 euros.

Considerations for breeding

This stallion is expected to breed true, in the sense that he should be able to pass on his own, confirmed quality. His particular quality for breeding is due to his many assets: outstanding type, movement, aptitude for jumping, excellent rideability and balance, and, particularly valuable, a strong character. Considering the reliability of his dam line, stem 2543, a stallion as typey as Unlimited should be well able to leave his mark as a sire.

Unlimited by Uriko KWPN – Casall

*2014 | 176 cm | Bay | LN: DE421000045414 | Mare family 2543

The 2016 champion stallion, Unlimited by Uriko, is one of these near-complete horses. Standing 176 cm at the withers, the bay stands out for his excellent lines, correct legs and blood horse charisma. Unlimited displays outstanding rideability and movement under saddle, but excels as a jumper. Despite his height, he is very agile and capable, very careful, with very good technique and tremendous scope.

Sire

At 9-year-old, his sire Uriko had already won six jumping classes at S level. His breeding is particular impressive as he combines highly successful international jumping bloodlines from France through Hors la Loi II – Papillon Rouge – Jalisco B and the Netherlands through Heartbreaker with top Holsteiner jumping blood through Landgraf I, Corrado I, and Carthago.

Damline

His second dam Arina's produce also includes the highly successful breeding and sport stallion Lasino and the Holsteiner-graded stallions Limoncello I and II. Concetto, a full brother to Unlimited's dam, already has results to M level.

For decades, the Thiedemann family's stem 2543 has been producing excellent international calibre show jumpers like for example Caretina de Joter, Lasino, Loreana, Boritas, Acasino B or Nina.

Own performance

Unlimited performed convincingly all along the line when he underwent 14-day ability assessment. His free jumping earned him the top mark 10.0, with his temperament, character, performance attitude, and canter graded 8.5, which resulted

in a jumping weighted final overall mark at 9.33. Five- and six-year-old, Unlimited developed and improved further and achieved placings in young horse jumping classes to M level. With Maximilian Gräfe he finished third in the State six-year-old jumping Championship at Elmshorn and qualified for the Warendorf National Championship.

In 2020 Unlimited was sold to the USA and will start his international jumping carrier there.

Offspring

Unlimited's first crop has left a very positive impression, as the inspection panel has seen many typey foals. This results in above average 141 points for type and conformation.

Two special foals qualified for the VTV/R+V Holsteiner foal championship in Bad Segeberg. The filly out of a Chepetto dam and the colt out of a Canturano I dam both finished on very good fifth position in the championship.

| | L.Coradin 160 cm | Corrado I | Cor de la Bryere SF Soleil |
| | L.Coradin 160 cm | Prinzessin | Ronald Komtessin |

Considerations for breeding

Uriko has already earned a reputation for sireing excellent type. Uriko offspring are modern, typey, and with good movement. His first crops have already yielded several excellent jumpers. Considering that he provides an interesting genetic alternative, he should be bred to mares with good quality movement and good natural rideability, preferably.

Uriko KWPN by Untouchable KWPN - Lavito

*2007 | 172 cm | Bay | LN: NLD003200707442 | Mare family 4172

Uriko was stallion-graded at the stallion approval in May 2011 and 70-day performance tested at Schlieckau. Uriko's admittance for stallion grading had been based on a breeding committee decision ruling 30-day ability assessment as successful stallion performance testing. Uriko embodies modern show jumping type. Standing 1.72m at the withers, the long-legged stallion totally complies with the Holsteiner Verband breeding stallion requirements. He has an expressive head, a well-set neck of good length and a well-structured and muscular back joined by powerful hindquarters. Uriko's bloodline is highly interesting as he carries a unique combination of international top jumping sires.

Sire

Uriko's sire Untouchable, performance-tested in competition at international top level himself, results from a cross of a son of French top sire Papillon Rouge to Dutch top stallion Heartbreaker. Through Carthago, Calypso I, Romantiker, and Cottage Son/TB the bloodline traces back to the important Holsteiner mare family 18A2.

Damline

Uriko's dam Wizzard is a daughter of Lavaletto son Lavito, a maternal grandson of top sire Carthago. Wizzard's dam line goes back to stem 4173 with crosses to the performance sires Corrado, Rocadero, Fasolt and Marlon/TB. Just recently, successful international sport horses from this family like for example Balourado, a Baloubet son ridden by Robert Smith, have been attracting attention.

Own performance

Uriko underwent performance testing in autumn 2011, with the judges confirming the talents previously shown by the young stallion. With his canter graded 9.25 and his jumping ability 8.83, his total

stallion performance test-based breeding value is 130. Uriko boasts an impressive track record under Maximilian Gräfe as he won six jumping classes at S* (1.40m) level and was highly placed in jumping classes to S** (1.45m) level. He continued his success story under Ebba Johansson with placings to S*** (1.50m) over the past seasons.

Offspring

Uriko's foal crops are characterized by very good type and have earned him 123 index points for type and conformation. His first crops have already produced seven licensed stallions including Unlimited, the 2016 Holsteiner champion stallion, and Uno I, the 2017 reserve champion stallion. All in all, three Uriko sons have been licensed for breeding at the 2017 Holsteiner stallion grading. And also his first sport horse offspring are very promising, like for example Uricas vd Kattevennen; this Zangersheide-licensed son placed third at the Lanaken World seven-year-old jumping horse Championships with Belgian Alexander Housen. Furthermore, Uriko attracted attention last year through his daughter Charisma HS, when the Uriko-Cassito daughter owned by Hugo Simon the Warendorf National five-year-old jumping horse Championship with Richard Vogel. The judges awarded marks as high as 9.3 for her performances.

Considerations for breeding

The

Clearway by Capitol I – Lord

*1993 | 169 cm | Grey | LN: DE321210218393 | Mare family 1916

Clearway is still considered one of the Holsteiner stud book's top sires after his death, as the valuable Capitol son excelled in sport and at stud.

Sire

His sire Capitol I topped the WBFSH show jumping sire ranking in 2000 and 2000, having been on second position in 1999. Though his sons Cassini I/Bo Kristoffersen/DEN and Franke Sloothaak, Cartiago Z/Jos Lansink/BEL, C-Indoctro/ Ulrich Kirchoff, Carolus I/Stefan Lauber/SUI and Hans-Peter Konle, Dobel's Cento/Otto Becker, VDL Cardento/Peter Eriksson/SWE, Calato/Herbert Blöcker and Jennifer Foghd Pedersen/DEN, he is still a major force, years after his death.

Damline

His dam, state premium mare Wodka from stem 1916, boasts an impressive ancestry and is one of the Holsteiner studbook's most distinguished mares. Her offspring includes the licensed stallions Conway I and II, by Caretino. Another Wodka son by Athlet, Arturo, was sold to the USA as a sport horse and breeding stallion. Her daughters Chika's Way by Caretino and Carassina by Concerto II were high-profile top-level jumpers placing to 1.60m. Carassina was the celebrated winner of the 2009 Hamburg Jumping Derby with Thomas Kleis and is dam to United Way, a highly regarded young breeding stallion. Wodka's exceptional potential is shaped by her maternal bloodline through the stallions Lord, Ramiro and Albrant, all of them high achievers. Lord used to be an international level eventer with Herbert Blöcker prior to becoming one of the Holsteiner studbook's most influential sires. Ramiro was an exceptional stallion, too, as a jumper with Fritz Ligges same as a sire.

Clearway's fourth generation sire in the tail female line, Albrant, has made eventing history with Herbert Blöcker, demonstrating his willingness to perform and his soundness in many big international tests, in particular the 1973 Kiev Europeans and the 1976 Montreal Olympics.

Own performance

Clearway demonstrated his own performance in young horse jumping classes already at a young age and went on to prove his exceptional quality as a jumper by competing at international level under the saddle of Lars Bak Andersen placing in the Neumunster and Braunschweig grands prix.

Offspring

He produces modern foals with great movement. As yet, 12 Clearway sons have been licensed for breeding, like for example Clarimo, a stallion with international results to 1.60m level with Rolf-Görran Bengtsson. In addition to his licensed sons, his sport horse offspring are attracting more and more attention. Glock's Cognac Champblanc, Claire Z, Clearwater and Carella are indicative of their sire Clearway's awesome inheritance.

Considerations for breeding

P

Lasino by Landgraf I - Capitol I

*1991 | 170 cm | Bay | LN: DE321210161491 | Mare family 2543

The stallion Lasino is a representative of the Holsteiner studbook's coveted L line and his pedigree reads like a Who's Who in show jumping. By Landgraf and with Capitol I, Lord, and Roman on the dam's side, his pedigree has the Holsteiner studbook's most important jumper sires closely knit together. As Lasino carries the Ladykiller TB performance genes through Landgraf and Lord as well as Capitol I and Ramzes, he is of great interest for the Holsteiner breeding programme, even more so seeing that he carries no Cor de la Bryère blood.

Damline

Line 2543 is a quite small mare family in comparison, but very successful. The dam line bred by the Thiedemann family goes back to the foundation mare Optik by Fanal and has produced many successful horses, including for example the licensed stallions Boritas, Lux Z and Coriando. Lasino's dam, Arina by Capitol I, produced the licensed sons Limoncello I and II, by Lorentin. Another produce of the Thiedemann family's line 2543 is the mare Loreana, a successful international level show jumper under the saddle of Achaz von Buchwaldt and later Lars Nieberg.

Own performance

His stallion performance test jumping index was 130 points. He was then shown in competition, at first by Bo Kristoffersen, then by Jörg Kreuzmann, who successfully competed him at international level in Dortmund, Neumunster and Aarhus.

Offspring

Lasino attracted attention in particular for his FEI show jumping offspring. With Alois Pollmann-Schweckhorst, his son Lord Luis was a member of the Nations Cup winning German team in La Baule and came 2nd in the first leg of the Global Champions Tour in Doha/Qatar which comes with big prize money. Another successful offspring is Le Beau: At his first international championship, the Mannheim Europeans, Le Beau took 13th place in the overall standings under his rider Stein Endresen. With two clear rounds in the Nations Cup he was instrumental in securing the Hong Kong qualification for the Norwegian team. With Stein Endresen, he reached the individual top 25 final at the Hong Kong Olympics, placing 16th in the overall standings. In 2009, the pair competed at the Windsor Europeans and placed in many shows with big prize money.

Leconte was no less successful. Under Marcus Ehning, he took home many prestigious placings and won among other achievements the Bordeaux world cup.

Of his younger offspring, Easy Going attracted particular attention in Schleswig-Holstein with Inga Czwalina. At 8 years old she achieved 45 wins and placings to S*** already. In 2012, Easy Going was successfully shown at international level by Ruben Romp.

| | | Cerena | Cobalt Emiliane |

Considerations for breeding

The

Cassini II by Capitol I - Caletto II

*1994 | 173 cm | Grey | LN: 276321210202094 | Mare family 3389

Cassini II by Capitol I presented himself at his 1996 stallion grading slightly more typey than his full brother. Unfortunately, he could not be shown in competition due to a tendon injury, but completed stallion performance testing at Radeplast with way above average results, finishing 3rd at 138 jumping index points. Moreover, he earned high marks for character and temperament.

Sire

His sire Capitol I topped the WBFSH show jumping sire ranking in 2000 and 2000, having been on second position in 1999. Though his sons Cassini I/Bo Kristoffersen/DEN and Franke Sloothaak, Carthago Z/Jos Lansink/BEL, C-Indoctro/ Ulrich Kirchoff, Carolus I/Stefan Lauber/SUI and Hans-Peter Konle, Döbel's Cento/Otto Becker, VDL Cardento/Peter Eriksson/SWE, Calato/Herbert Blöcker and Jennifer Foghd Pedersen/DEN, he is still a major force, years after his death.

Damline

Wisma, dam to Cassini I and II (as well as to Clarimo), carries interesting bloodlines and is by top sire Caletto II. Her produce includes a full sister to the above mentioned stallions, which in her turn produced the licensed stallion Lovari by Lasino I. Another Wisma daughter, Mira by Lansing, distinguished herself by producing a licensed stallion, as well; Her first son, Cassaro by Coronado, was stallion graded at Neumünster in 2004. Another notable representative of mare family 3389 is USA-licensed Oskar by Othello. He used to be a very successful show jumper. His 1996 achievements include winning the Queen Elizabeth II Cup in Spruce Meadows.

Offspring

Cassini II offspring display modern type and great jumping potential. Having made a name for himself for his very successful sport horse offspring, he still holds 38th position in the worldwide WBFSH sire ranking. His currently most successful son, C Hunter, is shown in jumping classes through 1.60m by US rider Lucas Porter.

In 2011, Cassini II died from an injury caused by accident in France.

Considerations for breeding

The

Quantum by Quidam de Revel SF - Cor de la Bryere SF

*1994 | 169 cm | Dark Bay | LN: DE321210112494 | Mare family 18B1

Then with a still very youthful appearance, Quantum won second reserve champion at the 1996 stallion licensing. Already at that time he stood out for his excellent performance type, balanced conformation and light-footed movement.

Sire

Quantum is by French-bred Quidam de Revel. Having taken team bronze and individual fourth at the Barcelona Olympics, Quidam de Revel was sold to Denmark for an incredible amount and was successfully shown at international level by Thomas Velin. He produced a great many top level show jumping offspring and is among the world's top sires.

Damline

Quantum's dam Ulla by Cor de la Bryère comes from mare family 18b1, which has produced many important sport horses and breeding stock for the Holsteiner stud book. Ulla's own produce also includes the stallion Serano. Her dam Ella is also dam to the stallion Constant by Cor de la Bryère. A full sister to Ulla, Palisa, produced Queen Liesa, also by Quidam de Revel, a mare boasting wins and placings at London, Nantes, and Donaueschingen with Felix Haßmann. Quantum's mare family, stem 18b1, has always been respected for producing performance stallions, with Cagliostro by Calando I, Roman by Ramzes and Farn by Fax I as well as Ronald by Ramiro tracing back to this important family.

Own performance

At

Offspring

Having stood for one season only in 1997, Quantum was put to stud again in 2001 following his offspring's very positive performance. Two sons from his first crop were presented for stallion grading and put up an excellent

free jumping performance, one of them the stallion Quintero, who went on to place at international 1.60m level with Rolf-Göran Bengtsson and sire highly successful offspring in his turn, as well. Other offspring like Silvertras with Jur Vrieling, Quality Time TN with Jeroen Dubbeldam/Charlie Jacobs (USA), AD Quantina with Mathilda Karlsson, Fixdesign Chopin with Filippo Marco Bogni (ITA) and T-Quinta with Norbert Ell (POR) performed convincingly all along the line at international top level.

Breeding Terms and Conditions 2020/2021

1. Breeding Season

The breeding season and the shipping of semen from Elmshorn begins around 16 February 2020 and ends around 10 August 2020. Fresh semen by stallions qualified to the National Championships is only available until 01 August 2020. Mares coming back into heat can be rebred (also to a different Verband stallion than before) in the current year to an on-station stallion (Badendorf, Bokel, Sollwittfeld, Wellinghusen) until 31 August 2020.

2. Semen Orders

Orders to have fresh semen shipped over night must be received by 9.30 a.m. at the latest along with the following information:

1. mare – name, sire-dam, life no.
2. mare owner, name, address, membership no.
3. requested stallion
4. inseminating vet incl. address
5. shipping destination
6. intended use for embryo transfer/ ICSI
7. telephone no. in case of enquiry call

Semen orders may be placed on the telephone, by e-mail, by fax or online. The semen order form can be downloaded from the Holsteiner Verband website. Prior to a mare's first insemination by a Holsteiner Verband stallion, mare owner and stallion keeper must agree on an insemination contract confirming the person signing the contract to be the owner of the mare stated in the contract or to be authorized by the owner to arrange insemination.

3. Stud Fees

The stallions available by semen through the Holsteiner Verband Hengsthaltungs GmbH, Elmshorn fall in four categories:

A: young stallions and sport stallions available by fresh and/or frozen semen

B: proven sires, available only by frozen semen, max. 2 inseminations per mare and season

C: various stallions available by frozen semen from the depot

D: external stallions or semen bought from outside the Verband

The fees for breeding to Holsteiner Verband stallions in 2020 are charged according to a two- or three-step system: stallion-specific basic fee – pregnancy rate – foal fee (certain stallions only).

The **stallion-specific basic fee** is the same for all breeders and is billed and payable after the first insemination.

In case no veterinary certificate stating the mare barren has been submitted to the Hengsthaltungs GmbH by 01 Oktober 2020, the mare shall be deemed successfully bred and pregnant. By the end of the 01 Oktober 2020, an additional **pregnancy rate** for the last stallion the mare was bred to becomes payable and will be billed. From that point on, stud fee I differs from stud fee II.

To be eligible for the lower stud fee I, the following requirements must be fulfilled:

1. The expected foal shall be registered with the Holsteiner Verband (Original or Global) the same year it is born.
2. The mare is entered into the Holsteiner Original or Holsteiner Global studbook the year the foal is born.
3. The mare owner is a Holsteiner Verband member (for at least one year)

In all other cases, stud fee II will be charged.

Membership application forms as printed on page 129 are available at the stallion stations or can be downloaded on the website.

Some stallions incur a **foal fee** payable after a living foal has been born. Should a mare successfully bred in 2020 not produce a viable foal the following year, a corresponding veterinary certificate must be submitted to Elmshorn. Otherwise, a foal fee might be charged. In the case a foal resulting from a stud fee I insemination is not registered with the Holsteiner Verband Original or HV Global the same year it is born (not registered at all or registered with another studbook), the full difference between stud fee I and II, rather than the foal fee, is payable.

Please note: In any case, the person stated on the insemination contract as mare owner and thus breeder of the foal will be charged the pregnancy rate and the foal fee, even if the mare and/or the foal have been sold since.

4. With regard to the stallions in category A, B, and C, semen shall be provided exclusively in order to inseminate the mare documented in the insemination contract. This being the case, the delivered semen must neither be used to inseminate another mare nor for any other purpose nor resold. The Holsteiner Verband Hengsthaltungs GmbH shall remain the owner of the semen. Any case of violation shall incur a breach of contract penalty triple the amount of the stud fee's total sum. With regard to the stallions in category D, the semen is handed over in accordance with the specifications made by the stallion owner in question.

4. Change of Stallion / Non-Availability of Stallions:

During the breeding season, a change of stallion is possible at any time. Please observe the following when changing to another Holsteiner Verband Hengsthaltungs GmbH stallion:

1. For stallions falling into category A, B and C the stud fee already paid will be credited to the new stud fee due and only the higher stud fee respectively the difference will be charged. When changing to a stallion incurring a lower stud fee, the difference will not be credited. For stallions in category B a maximum of two straws per mare and season will be made available but the stud fee already paid will be credited when changing to a category A or C stallion then.

2. No crediting or transfer of the stud fee already paid can be effected for category D stallions. However, the breeders may use a 3-year-old stallion owned by the Holsteiner Verband Hengsthaltungs GmbH without incurring additional charges.

Should neither fresh nor frozen semen of a certain stallion be available at the appropriate time due to unforeseeable circumstances (illness, death, or the like) or because the stallion is shown in competition, he is considered non-available. In this case, breeders may also use a higher-priced Verband stallion for a mare previously inseminated by another Verband stallion without extra charges. Should the second-choice stallion incur a lower stud fee and the mare conceive during the cycle, the stud fee difference will be credited, with no right to refund. Should the stallion the mare was first bred to be available again when the mare comes back into heat for the second time, then this stallion must be used. Should the breeder want to use the higher-priced stallion again, however, he is also charged the higher stud fee and has to pay the difference. Should the breeder choose to use a lower-priced stallion again, the difference becomes forfeit.

5. Embryo Transfer and ICSI

It is mandatory to state a mare's intended use for embryo transfer when ordering semen and to record the intention every time the mare is inseminated. Moreover, mare owner and stallion keeper must sign a separate Embryo Transfer Agreement prior to the first insemination. Each flushing of an embryo as well as the surrogate mares must be documented and the breeder must inform the stallion keeper as to the result immediately after flushing. In case of an embryo transfer without prior notification, the double price is charged for each insemination. The stallion-specific stud fee will be charged for every flushed embryo (also when frozen). In case of successful embryo transfers, the pregnancy rate will be charged for each pregnant surrogate at the end of the breeding season (effective date: 01.10.2020) Casall is only available for embryo transfer with a special permission in writing.

Prior to the ordering party or a third party's use of Holsteiner Verband Hengsthaltungs GmbH stallion semen for ICSI, the approval of the Holsteiner Verband Hengsthaltungs GmbH must be obtained in writing. In

case the ordering party violates this obligation with the ordering party or a third party using Holsteiner Verband Hengsthaltungs GmbH stallion semen for ICSI without obtaining the prior approval of the Holsteiner Verband Hengsthaltungs GmbH in writing, this shall incur a €25,000 (incl. VAT) contractual penalty per each singular violation payable by the ordering party in favour of the Holsteiner Verband Hengsthaltungs GmbH. Further existing Holsteiner Verband Hengsthaltungs GmbH damage claims shall remain unaffected.

6. Crediting

Should a mare bred in 2020 not conceive and a veterinary certificate stating the barren status is submitted to Elmshorn by 01 Oktober 2020, no pregnancy rate will be charged (thus no crediting).

Should a mare first inseminated by a category A, B or C stallion after 01 July 2020 not conceive in 2020, the stud fee will be credited for breeding the same mare to a Holsteiner Verband stallion the following breeding season. This right may only be transferred to another mare if the barren mare is dead or no longer used for breeding. If the mare is sold, crediting remains with the mare. If a lower-priced stallion is used the following year or the mare is not bred, the amount is forfeit.

No crediting whatsoever for category D stallions.

No pregnancy guarantee whatsoever for any stallion, the stallion-specific fee is due in any case.

7. Shipping of Semen

The Holsteiner Verband Hengsthaltungs GmbH, Elmshorn strives to provide all breeders with the chosen semen in the best possible way. The shipping of semen by frequently used stallions in great demand may be restricted to max. 2 straws per mare per heat cycle. Mare owners are advised to have ovaries, uterus, and cervix of their mares in heat examined by an experienced vet to determine the best time for breeding.

Please see page XXX for further information and shipping costs.

The stud fee overview on pages 124 to 127 provides you with information which stallions are available for on-farm insemination or shipping of fresh semen within Germany or Europe. During the breeding season, our website offers regular updates of this list.

8. Foal/no Foal Report

Foal/no Foal Reports are issued to the breeder by the Holsteiner Verband Hengsthaltungs GmbH, Elmshorn, after the stallion service reports have been checked in December. The Foal/no Foal Report has a different colour every year.

It involves:

- covering certificate (confirmed by the Holsteiner Verband office)
- Foal/no foal report card, to be completed by the mare owner legibly - preferably in block capitals - and to be

Conditions 2020/2021

Additional Conditions applying to Holsteiner Verband Stallion Stations

Shipping of semen to Verband Stallion Stations

To breeders within Schleswig-Holstein, semen of nearly all Verband stallions can be made available at any stallion station of the Holsteiner Verband Hengsthaltungs GmbH, Elmshorn. Semen is delivered to the chosen station by night courier free of shipping charges. On-farm insemination is another option for Schleswig-Holstein breeders. Here semen is ordered through a station and is shipped to this station free of charge. Upon arrival at the station, the semen is delivered to a contracted vet licensed to inseminate the mare directly on the breeder's premises.

2. The person in charge of the station is obliged to ask a member wanting to breed a mare for the membership number and the mare's equine passport. Should the owner have outstanding debts to the Holsteiner Verband Hengsthaltungs GmbH, Elmshorn, despite several reminders, the mare/s will not be bred!

3. Prior to breeding / insemination by a frequently used stallion, the station director is entitled to have the station's vet examine a mare to ensure the presence of a good-sized follicle (at least 35 mm) even though the mare might be showing clear signs of heat to a stallion at the station in order to spare the stallion and to improve pregnancy prospects. All barren and all 3-year-old mares must be swabbed clean. If this is not the case, the person in charge of the station is entitled to refuse breeding the mare in the best interest of all breeders.

4. Mares previously bred in the same season

The owner of the mare is obliged to inform the person in charge of the stallion station if the mare has been previously bred in the same season when changing the station. In any case, membership number and equine passport/ registration papers must be presented anew.

Stallion keeper and station staff are instructed to refuse breeding in case these prerequisites are not met.

5. Covering certificate

The covering certificate will be issued to the mare owner after the first heat cycle the mare has been bred / inseminated.

6. Mare health management

To boost fertility and to prevent the transmission of epidemic diseases to our stallions and mares, the following rules apply to the stallion stations of the Holsteiner Verband Hengsthaltungs GmbH, Elmshorn during the breeding season:

I.

a. On principle, only mares free from sexually transmitted diseases may be served by the stallions.

b. All barren mares, 3-year-old and older maiden mares, mares which had an abortion or delivered a dead or a weak, non-viable foal as well as mares with postpartum problems (retained afterbirth, etc) should undergo clinical and bacteriological examinations (swabs) by a vet as soon as possible. It is highly advisable to have the mare examined and swabbed when in heat. The corresponding veterinary certificate must be submitted to the person in charge of the respective stallion station along with the result of the swab.

c. Under special circumstances, the management of the Holsteiner Verband Hengsthaltungs GmbH, Elmshorn reserves the right to issue additional regulations applying to all or to individual stations.

d. Mares from premises which are or have been affected by epidemic disease (inter alia viral abortion) may only be brought to a Holsteiner Verband Hengsthaltungs GmbH, Elmshorn, stallion station for insemination with a permission of the respective stallion station's vet.

e. Mare owners are free to arrange for further examinations to improve fertility. It is advisable to have mares failing to conceive also tested for CEM.

II.

a. A mare coming back into heat for the second time cannot be rebred until a veterinary health certificate has been presented to the station director/veterinarian.

b. The mare owner is advised to have the mare appropriately examined already when she comes back into heat for the first time.

III.

a. Owners are advised to have their mares' pregnancy status checked at an early stage (day 15-17/ day 28-30, if necessary day 42, according to the insemination vet's instructions).

7. Mare Examinations

Based on the experience of the Holsteiner Verband Hengsthaltungs GmbH, Elmshorn, station vets it is suggested to have the swabs tested for the following germs:

1. beta haemolytic streptococci
2. haemolytic e coli
3. Pseudomonads
4. Klebsiella

5. yeast-like fungi

6. Staphylococcus aureus

Prior to breeding (live cover) a veterinary certificate confirming the mare free from the above mentioned germs must be presented to the station director. Only then natural breeding (live cover) of the mare is possible.

For artificial insemination, the swab tests required for live cover are recommended for 3-year-old maiden mares prior to breeding and for mares with a foal coming back into heat again after having been bred. Testing is mandatory for mares coming back into heat for the second time after having been re-bred.

The swab test results must not be older than six weeks and shall be in writing only.

8. Billing of Veterinary Charges for On-Station (at Holsteiner Verband Stallion Stations) and On-Farm (at Breeder's Premises) Insemination

Insemination by stallions owned by the Holsteiner Verband Hengsthaltungs GmbH, Elmshorn, starts on 16 February 2020 (approximately). For each individual mare, the breeder has two options for settling the veterinary charges. The decision must be made and written down in the insemination contract completed at the station prior to the mare's first insemination:

A. Direct billing by the vet based on the veterinary fee schedule or

B. Billing according to the applicable flat rate fee.

a. On-station insemination flat fee - fresh semen 180,- euros + VAT (total 214,20 euros)

b. On-station insemination flat fee - frozen semen 400,- euros + VAT (total 476,00 euros)

c. On-farm (breeder's premises) insemination flat fee 330,- euros + VAT (total 392,70 euros) General:

The applicable flat fee will cover gynaecological examinations and inseminations under three heat cycles. In case of b) the mare will be inseminated with frozen semen under the first two heat cycles, if she does not conceive, she will be inseminated with fresh semen by a Verband stallion under the third heat cycle.

Coverage/outset of the flat fee: In addition to showing clear external signs of heat towards a teaser stallion, the mare must have a viable, good-sized follicle (35 mm at least). The station vet decides whether the mare is ready for insemination. If there is no viable follicle, all examinations and treatment necessary until such a follicle is present will be charged extra by the vet.

As of the fourth heat cycle, veterinary charges will be billed extra by the vet.

The vet charges the mare owner extra for follicle examinations carried out when the mare is not in heat as well as for additional veterinary treatment, specific hormonal treatment, administration of ovulation induction agents, swabs, and pregnancy checks.

It is always advisable for the breeders to have all mares' pregnancy status checked at that time of the year in order to be able to plan necessary veterinary treatment should a mare be barren or no longer pregnant in order to prepare and "clean up" the mares in good time for the new breeding season.

Whenever the stallion station is changed, the flat fee becomes payable anew and is billed directly by the vet in question. When changing the stallion station later than 1 August 2020, the flat fee cannot be opted for, but all charges will be billed directly by the vet in question.

Additional information to b)

As the mare must be closely monitored several times a day when using frozen semen, call-out charges incurred outside regular station hours will be charged separately at cost.

The frozen semen flat fee is only an option for stallions selected by the Holsteiner Verband Hengsthaltungs GmbH, Elmshorn, known for an acceptable AI fertility index.

Moreover, the frozen semen insemination flat fee is only available to mares accepted by the station vet as free from gynaecological disorders and diseases and with an acceptable conception prognosis and may be refused due to a mare's old age, acute and chronic gynaecological disorders or a history of barrenness.

In this case, the station vet must state the reasons for his refusal and discuss it with the owner of the mare. Should the mare owner insist on inseminating the mare with frozen semen in spite of a doubtful or poor conception prognosis, the owner will be billed directly and alerted to the risk of increased charges.

In addition to c)

The following rules apply for on-farm insemination:

1. The breeder's stable must meet the basic requirement (examination stand (according to the vet's requirements), floor space for ultrasound scanner and medical equipment, washing facility, mare is stabled on the premises (vet may charge extra for a long wait)). In individual cases, the vet can refuse insemination (for example due to inadequate conditions, excessive distance).
2. Only station vets or vets from a veterinary clinic contracted by the respective Holsteiner Verband Hengsthaltungs GmbH, Elmshorn insemination station qualify for on-farm insemination.
3. Semen is ordered through a Holsteiner Verband Hengsthaltungs GmbH, Elmshorn stallion station in the breeder's area which collects the appropriate information and places the orders at Elmshorn. Prior to insemination, the breeder has to conclude an insemination contract in writing. Semen is delivered from the Elmshorn station to the station in the breeder's area. Per heat cycle, a maximum of 3 insemination doses will be provided.

Studbook Holstein Global

New opportunities for all breeders wanting to join the successful Holsteiner studbook with their non-Holsteiner mares and stallions.

With the studbook Holstein Global, the Holsteiner Verband has amended its breeding rules to include breeders of outside-blood horses into the Holsteiner breeding programme.

The studbook "Holstein Global" is on equal footing with the Holsteiner studbook I. This means, non-Holsteiner mares as well as stallions and their offspring may be bred within the Holsteiner breeding programme in various combinations.

! Studbook Holstein Global for mares

Any mare holding registration papers from a WBFSH affiliated studbook recognized in the Holsteiner Verband articles and bylaws may be presented for Holstein Global registration. Mares may be registered at inspection sites in Schleswig-Holstein, Germany, and abroad.

The produce of these mares:

Foals out of these mares – the next generation – are registered into the studbook Holstein Global. However, there is one pre-condition, as the foal must be by a stallion registered into the Holsteiner Verband stallion book I. The foals being 50 per cent Holsteiners are registered into the Holsteiner Verband studbook and issued Holsteiner pedigree papers. Female foals registered in this way are eligible for entry into the established mare book I at 3-year-old/older whereas colts may be presented for pre-selection for Neumünster stallion grading.

At a glance

outside blood mare (Holstein Global) x Holstein-registered stallion (stallion book I)

or

Holsteiner mare (studbook I) x outside blood stallion (Holstein Global)

- foal with 50% Holsteiner ancestry
- foal initially registered Holstein Global

- Holsteiner registration/pedigree papers
- equal status as studbook I Holsteiners
- mares eligible for entry into Holsteiner Verband studbook I at 3-year-old and older
- colts may be presented for stallion grading pre-selection

Join the Holsteiner Verband!

For centuries, horse breeding and equestrianism have played an important role in our land between the seas - Schleswig-Holstein, the horse country between the seas.

Our Holsteiners have become world famous since, they have gained a following from various nations and people all across the world breed Holsteiner horses.

We invite you to join us and become a Holsteiner Verband member, to become part of our community striving to breed the best Holsteiner horses. Wherever you live, wherever you come from, you are welcome.

The different types of membership

The membership is not heritable, but may be transferred to a natural person in case of legal succession to a breed operation.

Active and Passive Membership

A full member with no breeding stock activated is considered a passive member. Full members with activated and registered breeding stock are considered active members.

Membership on time (1 year)

A temporary member shall enjoy the full rights and obligations of a full member for a period of one year from the date of admission. A member on time can convert the membership into an ordinary membership at any time by a declaration in text form.

Regular membership

Regular membership is open to any individual, private partnership under the Civil Code, or legal entity fulfilling the requirements of the latest version of the Animal Breeding Act and willing to acknowledge the latest version of the Holsteiner Verband rules and regulation.

Breeding partnership (2 Verband members)

Private partnerships under the Civil Code (breeding partnerships) may be formed by two Verband members at least. One of them must be named to the Verband as having power of sole representation so that any declaration executed by the Verband towards this person is effective for both partners.

For more information about the membership at the Holsteiner Verband visit us at
