

STUDENT EMPOWERMENT AND LEADERSHIP

IN PARTNERSHIP WITH

WHAT IS GROWTH MINDSET?

What are **phrases** that you always heard from students in your class?

What are **action** that they always do in class?

Phrases:

"I don't understand"

"It is difficult"

"I can't do it"

"I am not good at this"

"I will never get this right"

Actions:

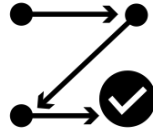

Quickly erase the error and write the correct one

Conceal own answer when someone approach

Avoid eyes contact with teacher

Students with growth mindset believe that ability can be developed through effort and hard work. They focus on **"What is my growth"**, **"What can be improved"** than "How did I do". A child with a fixed mindset may not engage with the process of learning, believing that any challenges they face are due to a lack of natural talent, skill, or intelligence. They will approach learning and challenges with an "I'm not good at this" attitude. Growth mindset is the key to student empowerment and taking lead in their learning

HOW CAN WE SUPPORT THE DEVELOPMENT OF GROWTH MINDSET VIA CULTURE OF ERROR?

Expect Error

Include what common errors students will be making in lesson plan and communicate the expectation about making mistakes before or during the lesson

Example: "This section is a tough one, just try your best"

Withhold the Answer

Allow other students to review opinions or answer before revealing the right answer so students are focusing on the explanation

Example: "Before I review the answer, would like to hear how you get the answer?"

Praise Risk Taking

Provide structured feedback that include students effort in trying even they are not sure.

Example: "I am glad you made the mistake"
